Supplemental Q1'24 Earnings Presentation

May 6, 2024

ZETA

Forward-looking statements and non-GAAP measures

This presentation, together with other statements and information publicly disseminated by the Company, contains certain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. The Company intends such forward-looking statements to be covered by the safe harbor provisions for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995 and includes this statement for purposes of complying with these safe harbor provisions. Any statements made in this presentation or during the earnings call that are not statements of historical fact, including statements about our second, third, and fourth quarters and full year 2024 guidance, the Zeta 2025 targets, and the timing of when we will achieve such targets, our ability to execute on KPIs and grow our scaled and super scaled customers, expected political candidate revenues, anticipated stock based compensation reductions, the capabilities of AI and Zeta's platform, and the growth and expansion of the Zeta Marketing Platform, are forward-looking statements and should be evaluated as such. Forward-looking statements include information concerning our anticipated future financial performance, our market opportunities and our expectations regarding our business plan and strategies. These statements often include words such as "anticipate," "expect," "suggests," "plan," "believe," "intend," "estimates," "targets," "projects," "should," "could," "would," "may," "will," "forecast," "outlook, "guidance" and other similar expressions. We base these forward-looking statements on our current expectations, plans and assumptions that we have made in light of our experience in the industry, as well as our perceptions of historical trends, current conditions, expected future developments and other factors we believe are appropriate under the circumstances at such time. Although we believe that these forward-looking statements are based on reasonable assumptions at the time they are made, you should be aware that many factors could affect our business, results of operations and financial condition and could cause actual results to differ materially from those expressed in the forward-looking statements. These statements are not guarantees of future performance or results. The forward-looking statements are subject to and involve risks, uncertainties and assumptions, and you should not place undue reliance on these forward-looking statements. These cautionary statements should not be construed by you to be exhaustive and the forward-looking statements are made only as of the date of this presentation. We undertake no obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as required by applicable law.

The second quarter and full year 2024 guidance and Zeta 2025 targets provided herein are based on Zeta's current estimates and assumptions and are not a guarantee of future performance. The guidance provided and Zeta 2025 targets are subject to significant risks and uncertainties, including the risk factors discussed in the Company's reports on file with the Securities and Exchange Commission, that could cause actual results to differ materially. There can be no assurance that the Company will achieve the results expressed by this guidance or the targets.

This presentation contains non-GAAP financial measures such as adjusted EBITDA, adjusted EBITDA margin, and free cash flow ("FCF"). These measures are not prepared in accordance with generally accepted accounting principles in the United States of America ("GAAP") and have important limitations as analytical tools. Non-GAAP financial measures are supplemental, should only be used in conjunction with results presented in accordance with GAAP and should not be considered in isolation or as a substitute for such GAAP results. Refer to the Appendix of this presentation for (i) the definitions of the non-GAAP measures used in this presentation and (ii) a reconciliation of the non-GAAP financial measures used herein to the most directly comparable financial measures calculated and presented in accordance with GAAP.

Free Cash Flow[2]	–	**$75M – $85M**	–	**$80M**

The 2Q'24 and FY'24 guidance provided herein are based on Zeta's current estimates and assumptions and are not a guarantee of future performance. The guidance provided is subject to significant risks and uncertainties, including the risk factors discussed in the Company's reports on file with the Securities and Exchange Commission, that could cause actual results to differ materially. There can be no assurance that the Company will achieve the results expressed by this guidance.

We calculate forward-looking non-GAAP Adjusted EBITDA, Adjusted EBITDA margin, and Free Cash Flow based on internal forecasts that omit certain amounts that would be included in forward-looking GAAP net income (loss) margin and GAAP cash flows from operating activities, respectively. We do not attempt to provide a reconciliation of forward-looking non-GAAP Adjusted EBITDA, Adjusted EBITDA margin, and Free Cash Flow guidance to forward looking GAAP net income (loss), margin, and GAAP cash flows from operating activities respectively, because forecasting the timing or amount of items that have not yet occurred and are out of our control is inherently uncertain and unavailable without unreasonable efforts. Further, we believe that such reconciliations would imply a degree of precision and certainty that could be confusing to investors. Such items could have a substantial impact on GAAP measures of financial performance.

Zeta's long-term partnership with global healthcare provider results in double-digit growth in spend

Published 2/27/24

Global Medical Response

Acquire | Grow | Retain

USE CASE

THEIR CHALLENGES

- Cultivating loyalty among members to grow existing customer base and improve retention rates
- Determining the right marketing mix to drive optimal results
- Driving product awareness, and converting leads

WHY ZETA

- Our personalized solution accelerated GMR's membership conversions and exceeded revenue from membership targets every year
- Our strategic omnichannel approach including Email, Search, Social, Programmatic

OUR PARTNERSHIP

- 10+ years; Zeta viewed as a trusted advisor and an extension of GMR marketing team
- Ability to lower total marketing costs and increase customer retention

Key Stats

More than **3/4th of Revenue is Recurring**, up from half 2 years ago

Expanded to 10 channels from 6 in over last two years

THEME: Long tenured, high recurring, high channel adoption on the ZMP

Zeta's data Management, identity resolution, and direct channel expansion drive increased sales

Published 2/27/24

Acquire | Grow | Retain

USE CASES

THEIR CHALLENGES

- Absence of unified identity with siloed data across multiple platforms
- 70%+ of web visitors are anonymous
- Lack of tech integration strategy

WHY ZETA

- Our CDP technology consolidated disparate Enterprise and online data
- Our seamless Snowflake integration enabled nearly real-time data sharing and enrichment
- Our strategic omnichannel approach on direct channels including CDP, Email, Website Personalization

OUR PARTNERSHIP

- Reduced audience & campaign creation from days to minutes and lowered cost per acquisition
- Anonymous web visitors converted to retained customers
- Acquisition Email has driven significant incremental lease activity

Key Stats

90%+ direct mix

14% reduction in media spend

30 hours saved per campaign

T H E M E : Lowering customer Total Cost of Ownership through Zeta's Direct channels

Zeta's intelligence and activation drove 86% increase in sales at locations targeted versus prior period

Published 2/27/24

Driven Brands

AGN AutoGlassNow · Maaco · Take 5 Oil Change · Take 5 · meineke

Acquire | Grow | Retain

USE CASES

THEIR CHALLENGES

- Lack 'Single View of the Customer' across their multiple brands
- Inability to measure offline to online activities and attribute spend, increasing costs
- Difficulty identifying in-market status has resulted in declining businesses

WHY ZETA

- Our identity resolution and ability to target individuals across channels with cross promotion between brands to foster loyalty
- Our ability to drive more effective targeting
- Personalized cross-sell and upsell strategies

OUR PARTNERSHIP

- Began as a pilot that quickly grew into 6 channels and expanded into 2 use cases
- Supportive mix of technical deliverability and hands-on structural engineering
- Personalization at scale focused on time to value and profitability

Key Stats

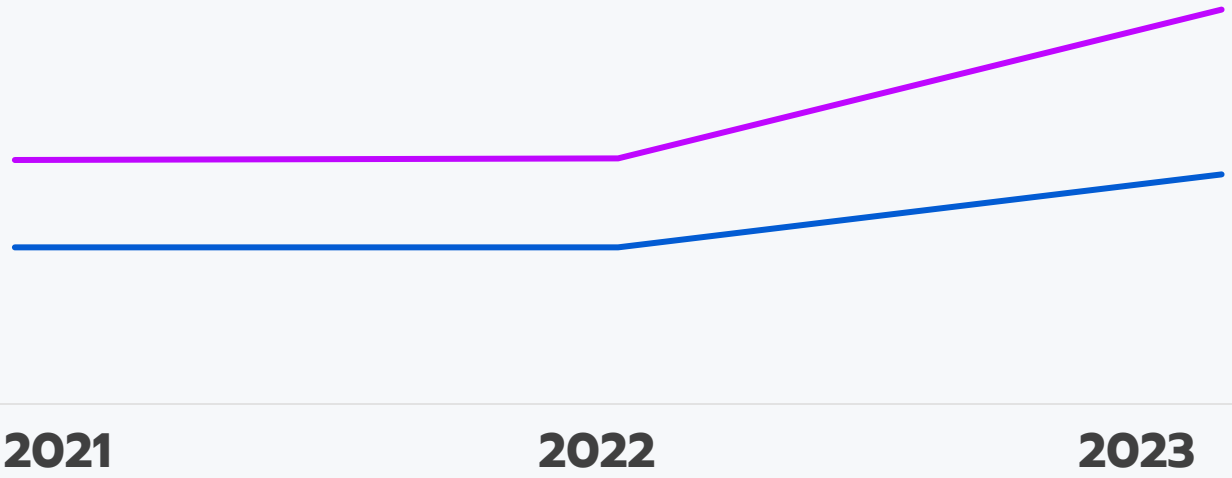
Uses **6 channels** in the 1st year

40% Increase in weekly average in-store traffic

T H E M E : Realizing the power of identity resolution & omnichannel engagement

Our identity data graph is durable and growing

In an Evolving Data Privacy Environment, Zeta's Proprietary Identity Data Set has Consistently Grown



15B+ Unique Global Digital Identifiers In US

Appendix

Footnotes

1 | 1Q'24 GAAP net loss of $40M, or 20% of revenue, includes $53M of stock-based compensation. See the graded vesting schedule on slide 20.

2 | Adjusted EBITDA, Adjusted EBITDA Margin, and Free Cash Flow are non-GAAP metrics, see reconciliations in the Appendix.

3 | 1Q'24 revenue includes $0.8M for January and February from the prior acquisition of WhatCounts Inc

4 | We define scaled customers as customers from which we generate at least $100,000 of revenue on a trailing twelve-month (TTM) basis.

5 | We define super scaled customers, which is a subset of scaled customers, as customers from which we generate at least $1,000,000 of revenue on a trailing twelve-month (TTM) basis.

6 | We calculate the scaled customer average revenue per user ("ARPU") as revenue for the corresponding period divided by the average number of scaled customers during that period. We believe that scaled customer ARPU is useful for investors because it is an indicator of our ability to increase revenue and scale our business.

7 | We calculate the super-scaled customer average revenue per user ("ARPU") as revenue for the corresponding period divided by the average number of super-scaled customers during that period. We believe that super-scaled customer ARPU is useful for investors because it is an indicator of our ability to increase revenue and scale our business.

8 | Direct Platform Revenue Mix: Percent of revenue generated by the ZMP comprised of subscription software and utilization fees generated by channels owned and operated by Zeta, resulting in stronger operating leverage.

9 | Calculations are based on initial guidance considerations given on February 27, 2024; At that time, FY Revenue and Adjusted EBITDA were guided to $875M and $166M respectively.

10 | The stock-based compensation estimate presented here is based on the unvested stock as of 3/31/2024 and does not include any future grants.

11 | Source: Gartner, ISBA, InsiderIntelligence, Statista. Compound Annual Growth Rate ("CAGR") is for 2023 through 2025.

12 | Net Revenue Retention ("NRR"): We use an annual NRR rate as a measure of our ability to retain and expand business generated from our existing customer base. We calculate our NRR rate by dividing current year revenue earned from customers from which we also earned revenue in the prior year, by the prior year revenue from those same customers. We exclude political and advocacy customers from our calculation of NRR rate because of the biennial nature of these customers.

13 | GAAP Cost of Revenues excludes depreciation and amortization and consists primarily of media and marketing costs and certain employee-related costs.

14 | Source: Fortune.com

15 | Source: Forrester 2023; Deloitte 2022

16 | Free Cash Flow to Adjusted EBITDA ratio is a non-GAAP financial measure defined as Free Cash Flow divided by Adjusted EBITDA for the same period.

2024 Zeta Global Corp. All Rights Reserved. ZetaGlobal.com

Non-GAAP measures

In order to assist readers in understanding the core operating results that our management uses to evaluate the business, we describe our non-GAAP measures referenced in this presentation below. We believe these non-GAAP measures are useful to investors in evaluating our performance by providing an additional tool for investors to use in comparing our financial performance over multiple periods.

Adjusted EBITDA: is a non-GAAP financial measure defined as net loss adjusted for interest expense, depreciation and amortization, stock-based compensation, income tax (benefit) / provision, acquisition related expenses, restructuring expenses, change in fair value of warrants and derivative liabilities, certain dispute settlement expenses, gain on extinguishment of debt, certain non-recurring IPO related expenses, including the payroll taxes related to vesting of restricted stock and restricted stock units upon the completion of the IPO, and other expenses. Acquisition related expenses and restructuring expenses primarily consist of severance and other employee-related costs which we do not expect to incur in the future as acquisitions of businesses may distort the comparability of the results of operations. Change in fair value of warrants and derivative liabilities is a non-cash expense related to periodically recording "mark-to-market" changes in the valuation of derivatives and warrants. Other expenses consist of non-cash expenses such as changes in fair value of acquisition related liabilities, gains and losses on extinguishment of acquisition related liabilities, gains and losses on sales of assets and foreign exchange gains and losses. In particular, we believe that the exclusion of stock-based compensation, certain dispute settlement expenses and non-recurring IPO related expenses that are not related to our core operations provides measures for period-to-period comparisons of our business and provides additional insight into our core controllable costs. We exclude these charges because these expenses are not reflective of ongoing business and operating results.

Adjusted EBITDA margin: is a non-GAAP financial measure defined as Adjusted EBITDA divided by the total revenues for the same period.

Free Cash Flow: is a non-GAAP financial measure defined as cash from operating activities, less capital expenditures and website and software development costs, adjusted for the effect of exchange rates on cash and cash equivalents.

Free Cash Flow to Adjusted EBITDA Ratio: is a non-GAAP financial measure defined as Free Cash Flow divided by Adjusted EBITDA for the same period.

Adjusted EBITDA, Adjusted EBITDA margin, and Free Cash Flow provide us with useful measures for period-to-period comparisons of our business as well as comparison to our peers. We believe that these non-GAAP financial measures are useful to investors in analyzing our financial and operational performance. Nevertheless our use of Adjusted EBITDA, Adjusted EBITDA margin, and Free Cash Flow has limitations as an analytical tool, and you should not consider these measures in isolation or as a substitute for analysis of our financial results as reported under GAAP. Other companies may calculate similarly-titled non-GAAP financial measures differently than us, thereby limiting the usefulness of these non-GAAP financial measures as a comparative tool. Because of these and other limitations, you should consider our non-GAAP measures only as supplemental to other GAAP-based financial performance measures, including revenues and net loss.

We calculate forward-looking non-GAAP Adjusted EBITDA, Adjusted EBITDA margin, and Free Cash Flow based on internal forecasts that omit certain amounts that would be included in forward-looking GAAP net income (loss) margin and GAAP cash flows from operating activities, respectively. We do not attempt to provide a reconciliation of forward-looking non-GAAP Adjusted EBITDA, Adjusted EBITDA margin, and Free Cash Flow guidance to forward looking GAAP net income (loss), margin, and GAAP cash flows from operating activities respectively, because forecasting the timing or amount of items that have not yet occurred and are out of our control is inherently uncertain and unavailable without unreasonable efforts. Further, we believe that such reconciliations would imply a degree of precision and certainty that could be confusing to investors. Such items could have a substantial impact on GAAP measures of financial performance.
