Norton Maximizes PC Performance and Security with Norton Utilities Ultimate

2021-06-29

New Offering Optimizes Windows PC Capabilities for Smooth and Secure Internet Browsing and Connection

TEMPE, Ariz.--(BUSINESS WIRE)-- NortonLifeLock (NASDAQ: NLOK), a global leader in consumer Cyber Safety, today unveiled Norton™ Utilities Ultimate, a new performance offering that creates a faster, smoother and more secure experience when gaming, browsing and streaming content on Windows PCs.

(Graphic: Business Wire)

"Just like changing the oil in your car is proper vehicle maintenance, Norton Utilities Ultimate is the PC performance maintenance that helps boost performance while also recovering lost files and protecting sensitive information, making your computer run like new again," said Gagan Singh, chief product officer at NortonLifeLock. "People may not know that the performance of their laptop can have a much longer lifespan when it's properly maintained."

PCs can get cluttered over time with old browsing data, broken shortcuts and uninstalled files, which results in slower performance, response time and internet speed. Norton Utilities Ultimate builds on Norton™ Utilities Premium with enhanced features that help improve overall device functionality, including but not limited to:

- **NetBooster:** Optimizes internet settings to identify bandwidth-clogging devices, and speed up videos, downloads and games. Users can also fine tune each internet setting, giving consumers full control of their network connection.
- **System Restore:** Rolls back recent system changes, once configured, without removing any apps, files, photos, music or videos.
- **System Privacy:** Turns off Windows 10 features to help ensure the content on the device stays private including the ability to securely "shred" files permanently.
- **Search & Recover:** Helps restore accidentally deleted or lost files, acting as a safety net for important documents and images.
- **On-Demand Boost:** Provides maximum power and speed by disabling background services that use system resources. By turning off unnecessary items, more resources are available for gaming, streaming and other high-performance applications.

Norton Utilities Ultimate is now available in the U.S., Australia, and New Zealand, starting at $69.99/year. For more information, visit: https://us.norton.com/norton-utilities-ultimate.[1]
