NEWS RELEASE

MDU Resources Publishes 2023 Sustainability Report

2024-06-28

BISMARCK, N.D., June 28, 2024 /PRNewswire/ -- MDU Resources Group, Inc. (NYSE: MDU) published its 2023 Sustainability Report today on its website at **www.mdu.com/sustainability**.

MDU Resources marked 100 years in business on March 14, 2024. While the report outlines the company's practices and results for 2023, achieving 100 years in business underscores MDU Resources' long-term commitment to doing what's right for its stakeholders by balancing economic, environmental and social considerations to ensure reliable, cost-effective products and services for its customers.

In 2023, MDU Resources achieved an 11% reduction in methane emissions from its natural gas utility segment as compared to 2022 and achieved a 38% reduction in its electric generation greenhouse gas emissions intensity since 2005. These and other results of the company's regulated energy delivery and construction services businesses are outlined in the report.

"Achieving 100 years in business is a result of our long-term commitment to doing the right thing for our customers, communities, employees and shareholders," said Nicole A. Kivisto, president and CEO of MDU Resources. "We remain on track for a late 2024 spinoff of our construction services business, Everus Construction Group. As we look to the future, we will be focusing on our regulated energy delivery business, which is where MDU Resources got its start 100 years ago. We remain committed to operating with integrity as we execute our core strategy."

Forward-Looking Statements

Information in this release includes certain forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934. The forward-looking statements in this release, including statements by the president and CEO of MDU Resources and comments about the planned spinoff of the construction services business, are expressed in good faith and are believed by the company to have a reasonable basis. Nonetheless, actual results may differ materially from

the projected results expressed in the forward-looking statements. For a discussion of important factors that could cause actual results to differ materially, refer to Item 1A — Risk Factors in MDU Resources' most recent Form 10-K and Form 10-Q and subsequent filings with the SEC.
