FORWARD-LOOKING STATEMENTS

In accordance with the safe harbor provisions of the Private Securities Litigation Reform Act of 1995, the Company notes that certain statements set forth in this presentation provide other than historical information and are forward looking. The actual achievement of any forecasted results, or the unfolding of future economic or business developments in a way anticipated or projected by the Company, involve numerous risks and uncertainties that may cause the Company's actual performance to be materially different from that stated or implied in the forward-looking statement. Among those risks and uncertainties, many of which are beyond the control of the Company, include, without limitation, fluctuations in worldwide energy demand and oil and gas prices; fleet additions by competitors and industry overcapacity; changes in capital spending by customers in the energy industry for offshore exploration, development and production; changing customer demands for different vessel specifications, which may make some of our older vessels technologically obsolete for certain customer projects or in certain markets; uncertainty of global financial market conditions and difficulty accessing credit or capital; acts of terrorism and piracy; significant weather conditions; unsettled political conditions, war, civil unrest and governmental actions, such as expropriation or enforcement of customs or other laws that are not well-developed or consistently enforced, especially in higher political risk countries where we operate; foreign currency fluctuations; labor changes proposed by international conventions; increased regulatory burdens and oversight; and enforcement of laws related to the environment, labor and foreign corrupt practices. Readers should consider all of these risks factors, as well as other information contained in the Company's form 10-K's and 10-Q's.

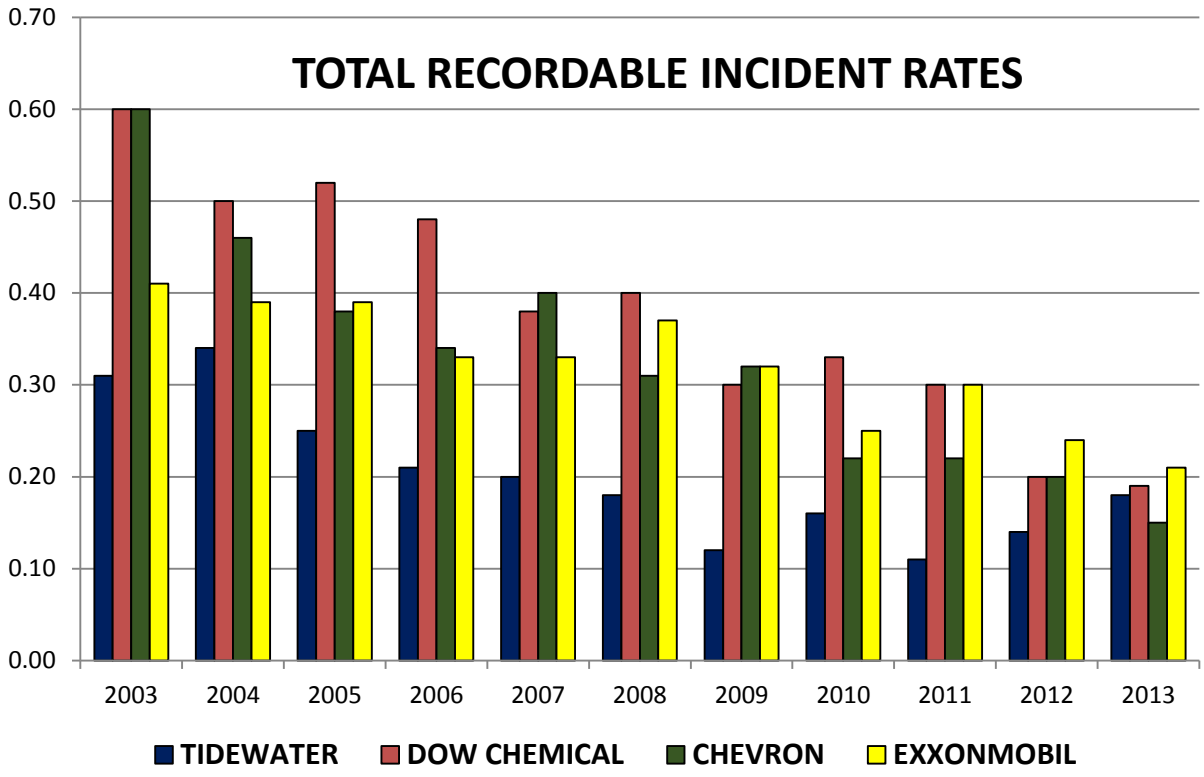
Key Tidewater Takeaways

- Consistent goal of "Best in Class" safety and compliance culture
- Largest "NEW" OSV fleet in the industry, operating in over 50 countries with ~9,000 employees worldwide
- History of earnings growth and solid returns
- "Offshore" is and will continue to be relevant. Constructive fundamental backdrop for the OSV industry
- Continued solid financial position, with considerable ready liquidity, a reasonable debt level, minor debt maturities until FY2019 and expected reduced CAPX as major fleet upgrade winds down

Safety Record Rivals Leading Companies

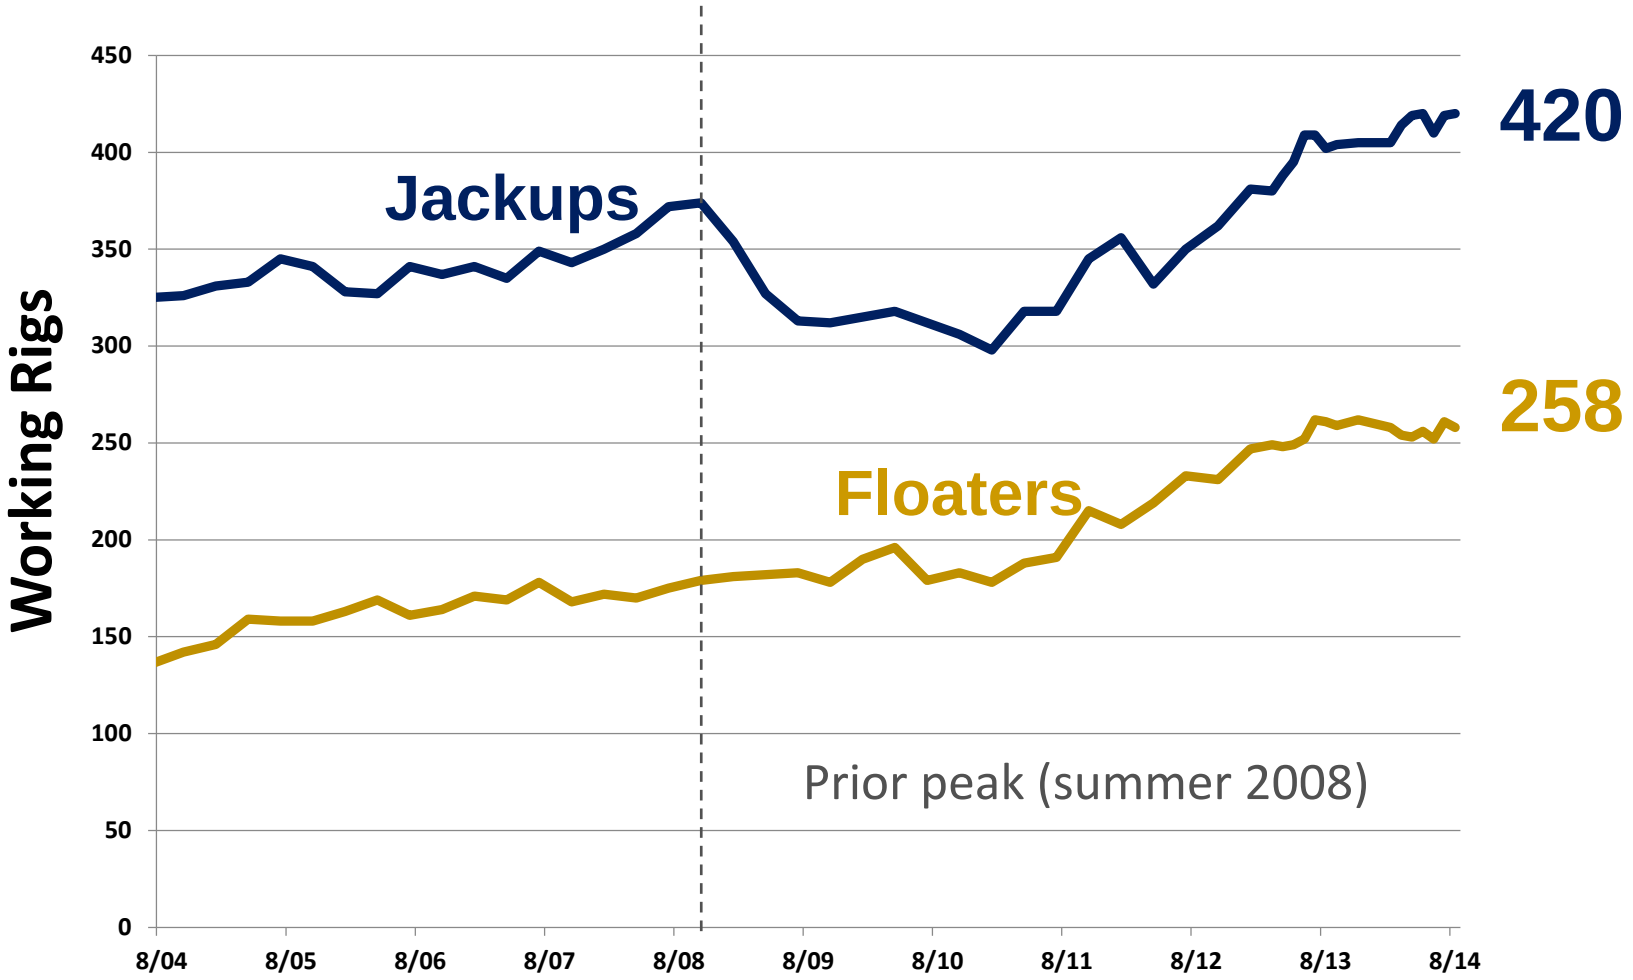
- Safe Operations is Priority #1
- Stop Work Obligation
- Safety performance is 25% of mgt. incentive comp



Operating safely offshore is like holding a snake by its head.

It's a task that can't be turned loose not for a microsecond or an accident will strike without pity.

Working Offshore Rig Trends



Source: ODS-Petrodata

Note: 42 "Other" rigs, along with the Jackups and Floaters, provide a total working rig count of 720 in August 2014.

Drivers of our Business "Peak to Present"

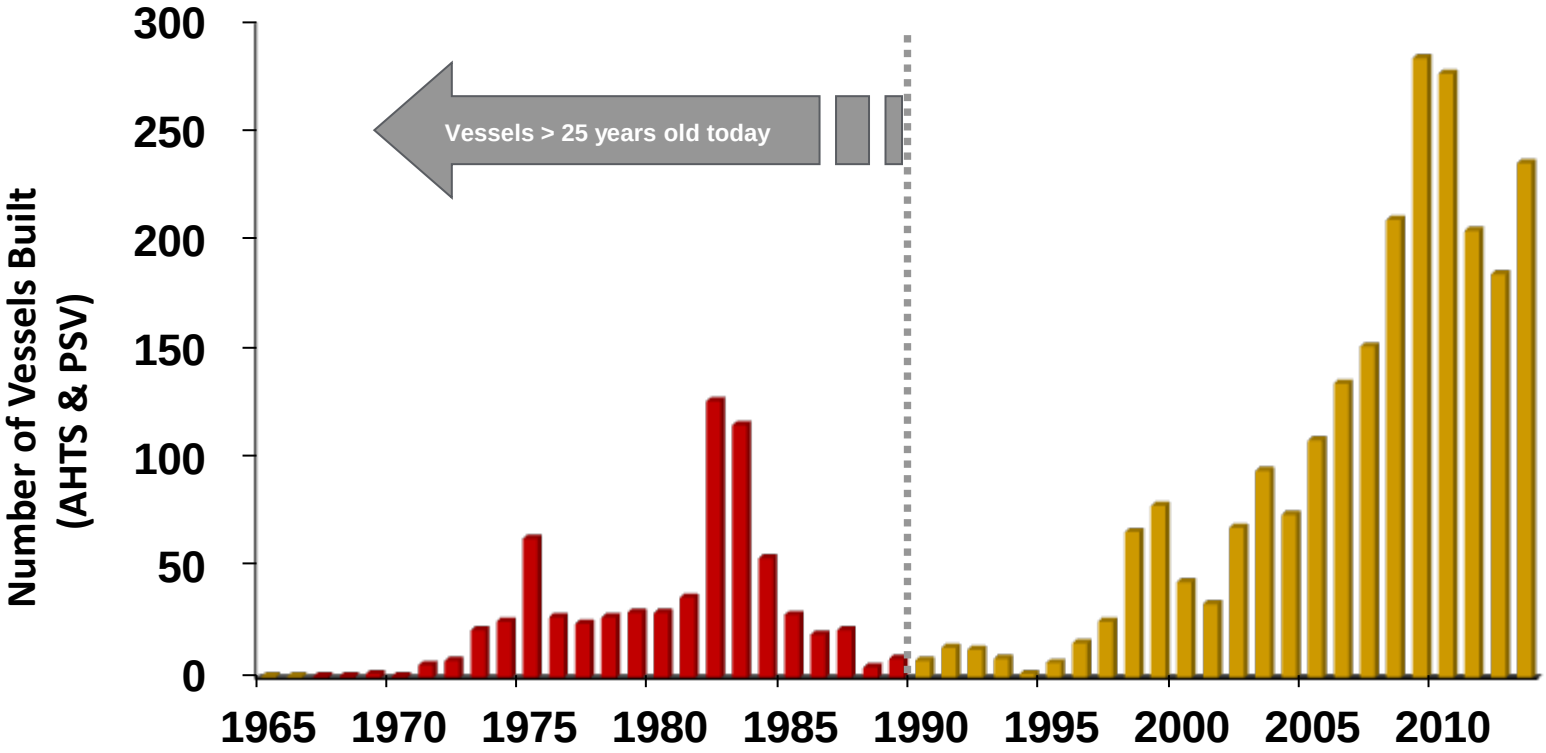
	July 2008 (Peak)	Jan. 2011 (Trough)	August 2014	
Working Rigs	603	538	720	Working offshore rig count is expected to grow
Rigs Under Construction	186	118	240	
OSV Global Population	2,033	2,599	3,203	Marketed OSV population should decrease as attrition exceeds newbuild deliveries
OSV's Under Construction	736	367	459	
OSV/Rig Ratio	3.37	4.83	4.45	OSV/Rig Ratio should remain well balanced

Source: ODS-Petrodata and Tidewater

The Worldwide OSV Fleet

(Includes AHTs and PSVs only) Estimated as of August 2014

As of August 2014, there are approximately 459 additional AHTS and PSV's (~14% of the global fleet) under construction.



Global fleet is estimated at 3,203 vessels, including ~700 vessels that are 25+ yrs old (25%).
