Utz Brands Inc.
EIN: 85-2751850
Attachment to Form 8937

14. Describe the organizational action and, if applicable, the date of the action or the date against which shareholders' ownership is measured for the action

Utz Brands Inc. ("Utz") declared and paid the following cash distributions during 2021:

- \$0.06 per share was declared on December 10, 2020, payable to shareholders of record on December 21, 2020, and paid on January 11, 2021;
- \$0.05 per share was declared on April 8, 2021, payable to shareholders of record on April 19, 2021, and paid on May 10, 2021; and
- \$0.05 per share was declared on June 10, 2021, payable to shareholders of record on June 21, 2021, and paid on July 12, 2021.

The listed distributions are in excess of Utz's current and accumulated earnings and profits and are considered nontaxable return of capital distributions.

15. Describe the quantitative effect of the organizational action on the basis of the security in the hands of a US taxpayer as an adjustment per share or as a percentage of old basis

The return of capital distributions will reduce the shareholder tax basis in each share by the amount of the distribution on the date of the distribution.

16. Describe the calculation of the change in basis and the data that supports the calculation, such as the market values of the securities and the valuation dates

After the close of Utz's fiscal period of January 4, 2021 through January 2, 2022 ("2021 Fiscal Year"), Utz will calculate its current and accumulated earnings and profits ("E&P"). Utz has projected its E&P for its 2021 Fiscal Year and it would characterize the listed distributions as distributions in excess of E&P, which is a return of capital that reduces each shareholder's tax basis in the applicable shares.

17. List the applicable Internal Revenue Code section(s) and subsection(s) upon which the tax treatment is based

Pursuant to IRC §§301(c)(1) and 316(a), the portion of the distribution which is a dividend is includable in gross income. Per IRC §301(c)(2), the portion of the distribution which is not a dividend shall be applied against and reduce the adjusted basis of the stock.

18. Can any resulting loss be recognized?

No loss may be recognized per the return of capital distributions. The shareholder's cost basis should be adjusted to reflect the return of capital distributions, which may affect the gain or loss realized upon disposition of the shares.

19. Provide any other information necessary to implement the adjustment, such as the reportable tax year

The organizational actions are reportable with respect to 2021. The information will also be reported on a 2021 Form 1099-Div, box 3. Pursuant to IRC §6045, as amended by the Emergency Economic Stabilization Act of 2008, brokers are required to reflect these adjustments in the cost basis reporting for covered securities. If a broker is not required to provide cost basis to a particular shareholder, the cost basis of the shareholder's shares should be adjusted as of the applicable distribution date to reflect the return of capital.
