ALEXANDER'S, INC.

OPERATING RESULTS FOR THE QUARTER AND SIX MONTHS ENDED

JUNE 30, 2009 AND 2008

The following table reconciles our net income to FFO:

	QUARTER ENDED JUNE 30,	

(Amounts in thousands, except share and per share amounts)	2009	2008
Net income attributable to Alexander's	$ 13,005	$ 38,454
Depreciation and amortization of real property	6,712	5,810
FFO	$ 19,717	$ 44,264
FFO per common share - diluted	$ 3.86	$ 8.68
Weighted average shares used in computing FFO per diluted share	5,105,936	5,097,722

(Amounts in thousands, except share and per share amounts)	SIX MONTHS ENDED JUNE 30,	
	2009	2008
Net income attributable to Alexander's	$ 59,059	$ 53,606
Depreciation and amortization of real property	12,301	11,011
FFO	$ 71,360	$ 64,617
FFO per common share - diluted	$ 13.98	$ 12.68
Weighted average shares used in computing diluted FFO per share	5,104,601	5,095,403

FFO is computed in accordance with the definition adopted by the Board of Governors of the National Association of Real Estate Investment Trusts ("NAREIT"). NAREIT defines FFO as net earnings determined in accordance with accounting principles generally accepted in the United States of America ("GAAP"), excluding extraordinary items as defined under GAAP and gains or losses from sales of previously depreciated operating real estate assets, plus specified non-cash items, such as real estate asset depreciation and amortization, and after adjustments for

unconsolidated partnerships and joint ventures. FFO and FFO per diluted share are used by management, investors and industry analysts as supplemental measures of operating performance of equity REITs. FFO and FFO per diluted share should be evaluated along with GAAP net earnings and earnings per diluted share (the most directly comparable GAAP measures), as well as cash flow from operating activities, investing activities and financing activities, in evaluating the operating performance of equity REITs. Management believes that FFO and FFO per diluted share are helpful to investors as supplemental performance measures because these measures exclude the effect of depreciation, amortization and gains or losses from sales of depreciable real estate, all of which are based on historical costs which implicitly assumes that the value of real estate diminishes predictably over time. Since real estate values instead have historically risen or fallen with market conditions, these non-GAAP measures can facilitate comparisons of operating performance between periods and among other equity REITs. FFO does not represent cash generated from operating activities in accordance with GAAP and is not necessarily indicative of cash available to fund cash needs as disclosed in the Company's consolidated statements of cash flows. FFO should not be considered as an alternative to net earnings as an indicator of the Company's operating performance or as an alternative to cash flows as a measure of liquidity.
