

BROADWIND | THINK BIG.

Second Quarter 2024 Conference Call Presentation

August 13, 2024

SAFE HARBOR STATEMENT

This document contains “forward looking statements”—that is, statements related to future, not past, events—as defined in Section 21E of the Securities Exchange Act of 1934, as amended, that reflect our current expectations regarding our future growth, results of operations, financial condition, cash flows, performance, business prospects and opportunities, as well as assumptions made by, and information currently available to, our management. We have tried to identify forward looking statements by using words such as “anticipate,” “believe,” “expect,” “intend,” “will,” “should,” “may,” “plan” and similar expressions, but these words are not the exclusive means of identifying forward looking statements. Forward looking statements include any statement that does not directly relate to a current or historical fact.

Our forward-looking statements may include or relate to our beliefs, expectations, plans and/or assumptions with respect to the following: (i) the impact of global health concerns on the economies and financial markets and the demand for our products; (ii) state, local and federal regulatory frameworks affecting the industries in which we compete, including the wind energy industry, and the related extension, continuation or renewal of federal tax incentives and grants, including the advanced manufacturing tax credits, and state renewable portfolio standards as well as new or continuing tariffs on steel or other products imported into the United States; (iii) our customer relationships and our substantial dependency on a few significant customers and our efforts to diversify our customer base and sector focus and leverage relationships across business units; (iv) our ability to operate our business efficiently, comply with our debt obligations, manage capital expenditures and costs effectively, and generate cash flow; v) the economic and operational stability of our significant customers and suppliers, including their respective supply chains, and the ability to source alternative suppliers as necessary; (vi) our ability to continue to grow our business organically and through acquisitions; (vii) the production, sales, collections, customer deposits and revenues generated by new customer orders and our ability to realize the resulting cash flows; (viii) information technology failures, network disruptions, cybersecurity attacks or breaches in data security; (ix) the sufficiency of our liquidity and alternate sources of funding, if necessary; (x) our ability to realize revenue from customer orders and backlog (including our ability to finalize the terms of the remaining obligations under a supply agreement with a leading global wind turbine manufacturer); (xi) the economy and the potential impact it may have on our business, including our customers; (xii) the state of the wind energy market and other energy and industrial markets generally, including the availability of tax credits, and the impact of competition and economic volatility in those markets; (xiii) the effects of market disruptions and regular market volatility, including fluctuations in the price of oil, gas and other commodities; (xiv) competition from new or existing industry participants including, in particular, increased competition from foreign tower manufacturers; (xv) the effects of the change of administrations in the U.S. federal government; (xvi) our ability to successfully integrate and operate acquired companies and to identify, negotiate and execute future acquisitions; (xvii) the potential loss of tax benefits if we experience an “ownership change” under Section 382 of the Internal Revenue Code of 1986, as amended; (xviii) the limited trading market for our securities and the volatility of market price for our securities; (xix) our outstanding indebtedness and its impact on our business activities (including our ability to incur additional debt in the future); and (xx) the impact of future sales of our common stock or securities convertible into our common stock on our stock price. These statements are based on information currently available to us and are subject to various risks, uncertainties and other factors that could cause our actual growth, results of operations, financial condition, cash flows, performance, business prospects and opportunities to differ materially from those expressed in, or implied by, these statements including, but not limited to, those set forth under the caption “Risk Factors” in Part I, Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2023, as supplemented by the risk factors set forth under the caption “Risk Factors” in Part II, Item IA of our Quarterly Report on Form 10-Q for the quarter ended June 30, 2024. We are under no duty to update any of these statements. You should not consider any list of such factors to be an exhaustive statement of all of the risks, uncertainties or other factors that could cause our current beliefs, expectations, plans and/or assumptions to change. Accordingly, forward-looking statements should not be relied upon as a predictor of actual results.

2Q24 PERFORMANCE SUMMARY

PERFORMANCE UPDATE

Second Quarter 2024

Investment Thesis

Building a platform for profitable growth

Building a profitable precision manufacturing platform to support growing **demand for energy transition and renewables-focused specialty fabrications and technologies**

Passage of the IRA **fundamentally transforming the margin and profitability profile of our business,** with a decade of tax credit support under the legislation

Building **balanced exposure across both renewables and diverse end-markets**, which provides more stability versus wind-only order flows

Strengthening liquidity position due to the monetization of earned AMP tax credits

Positioned to capitalize on a **recovery in the domestic onshore wind market into 2025-2026**

Targeted commercial expansion, improved operational execution

Strong 2Q24 Results

Strategic Progress Points

As of August 2024

Consistent operational execution. Operational execution drove favorable operating leverage as Adj. EBITDA margins remained steady despite softer onshore demand.

Targeted cost reduction actions. Implemented $4 million of annualized cost reductions beginning in the first quarter 2024

Opportunistic New Market Expansion. Targeted new customer relationships and receiving key certifications to participate in new high-growth verticals

Strengthened Liquidity and Balance Sheet. Total liquidity increased by more than $3 million y/y and TTM net leverage ratio declined by 0.9x y/y

Introduced third quarter 2024 financial guidance. Continued momentum expected within non-wind verticals; early recovery in onshore wind tower demand to begin in late 2024

CONSOLIDATED FINANCIAL PERFORMANCE

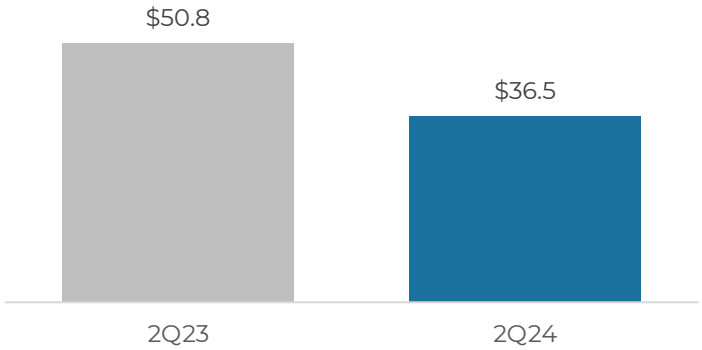

Operational excellence delivers solid operating leverage despite softer revenue generation

Sustained operational discipline, productivity improvements and price discipline drive consistent margins amid soft demand

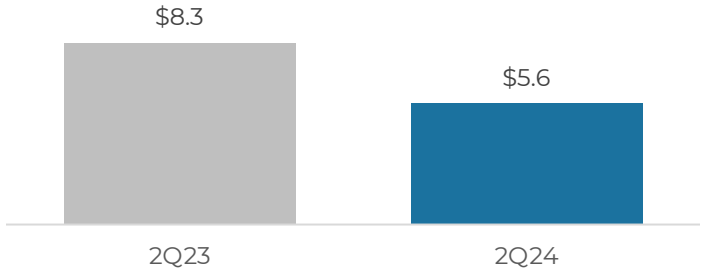

Year-over-year revenue decline in Heavy Fabrications and Gearing segments driven by softer demand for wind and oil & gas markets, partially offset by growth in Industrial Solutions

Gross margin decreased by 110 bps y/y to 15.3%, while Adjusted EBITDA margin decreased by 50 bps y/y to 10.0% on lower volumes

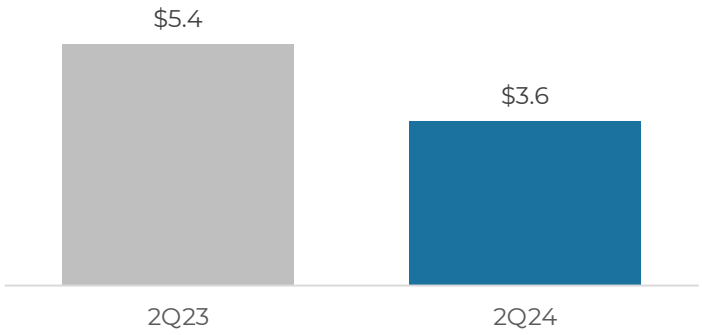

Total Revenue ($MM)

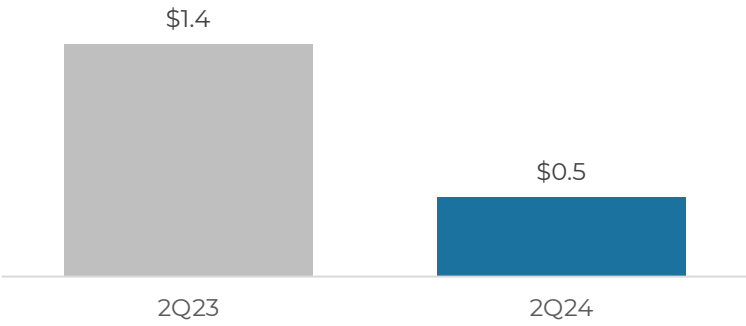

Gross Profit ($MM)

Adjusted EBITDA ($MM)

GAAP Net Income ($MM)

HEAVY FABRICATIONS SEGMENT

Second Quarter 2024

Solid operational execution supports consistent margin realization despite lower revenues

Consistent margin realization despite lower revenue generation, given transitional pause in wind tower demand

Segment EBITDA margin decreased 30bps y/y to 14.3% in 2Q24, on 42% lower revenue generation

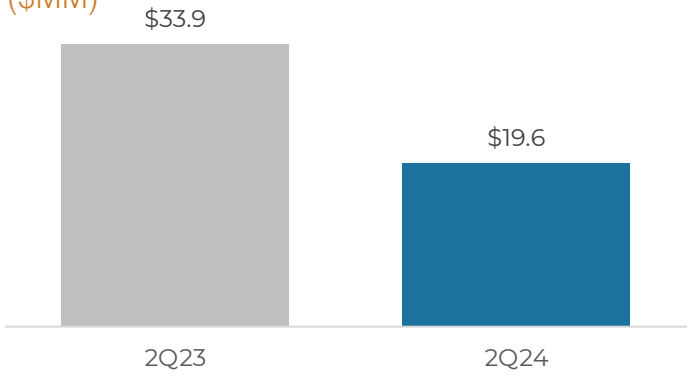

Sold 58 wind tower sections in 2Q24, a decline of 58% y/y

Segment book-to-bill remained steady sequentially at 0.5x

Segment backlog of $107 million as of 2Q24

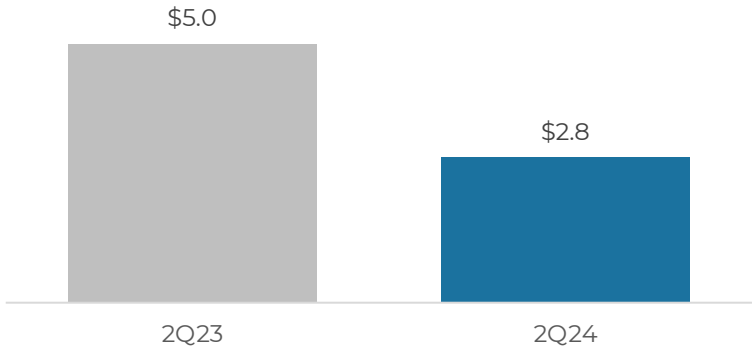

Segment Revenue

($MM)

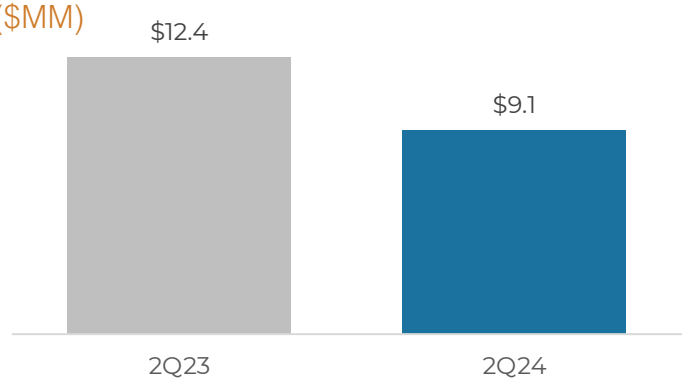

Segment EBITDA

($MM)

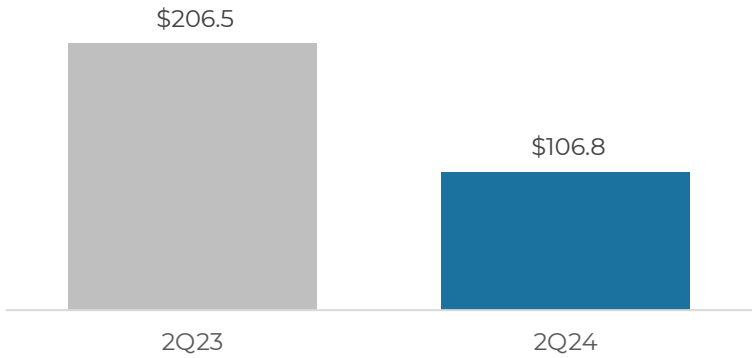

Segment Orders

($MM)

Segment Backlog at Quarter-End

($MM)

GEARING SEGMENT

Second Quarter 2024

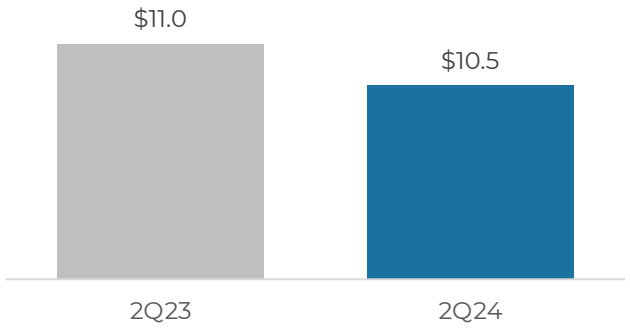

Operational efficiencies drive improved margins and profitability

Orders declined 19% y/y due to softer demand in industrial and steel markets

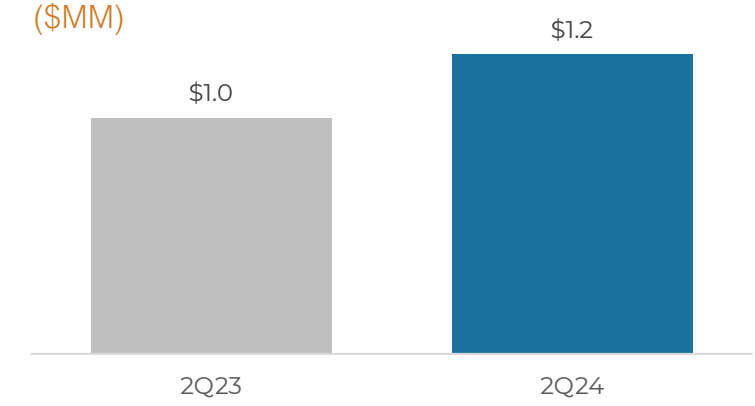

Favorable quoting activity with new customers in new and existing end-markets due to enhanced process capabilities and commercial sales efforts

EBITDA improvement driven by solid operational execution and favorable mix

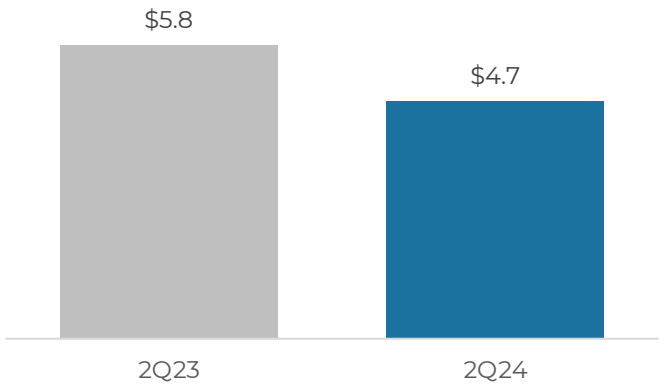

Segment Revenue
($MM)

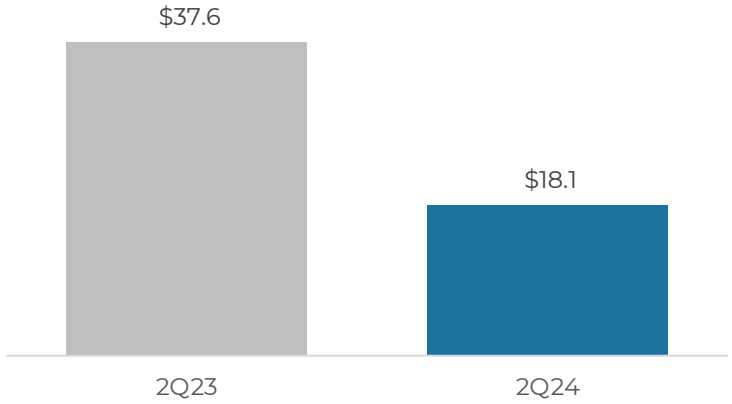

Segment EBITDA
($MM)

Segment Orders
($MM)

Segment Backlog at Quarter-End
($MM)

INDUSTRIAL SOLUTIONS SEGMENT

Second Quarter 2024

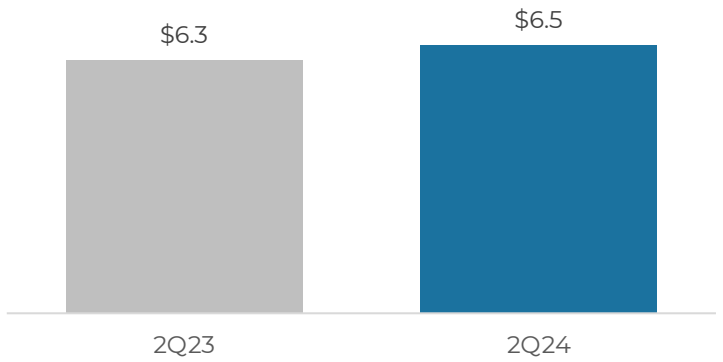

Continued demand growth within the natural gas turbine market, building on the market recovery evidenced throughout 2022-2023

Continued organic revenue growth, supported by strong demand for aftermarket gas turbine content

Segment revenue +3.1% y/y; segment EBITDA ($0.2) million y/y

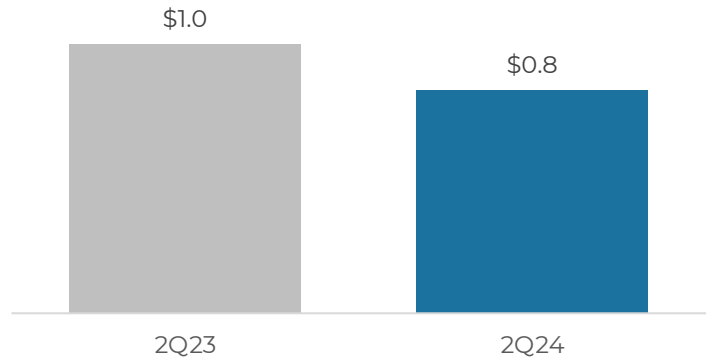

Segment Revenue

($MM)

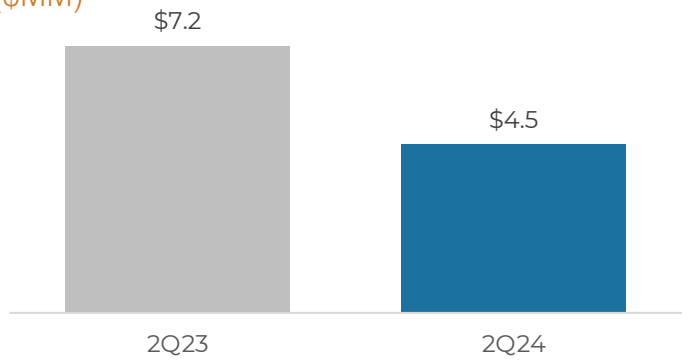

Segment EBITDA

($MM)

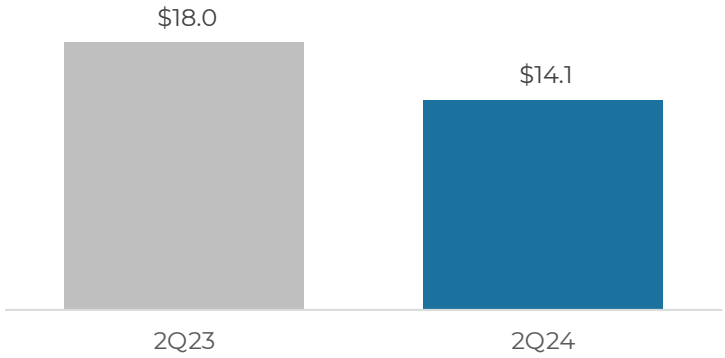

Segment Orders

($MM)

Segment Backlog at Quarter-End

($MM)

BALANCE SHEET UPDATE

Second Quarter 2024

Maintaining stable liquidity profile sufficient to support the long-term growth of the business

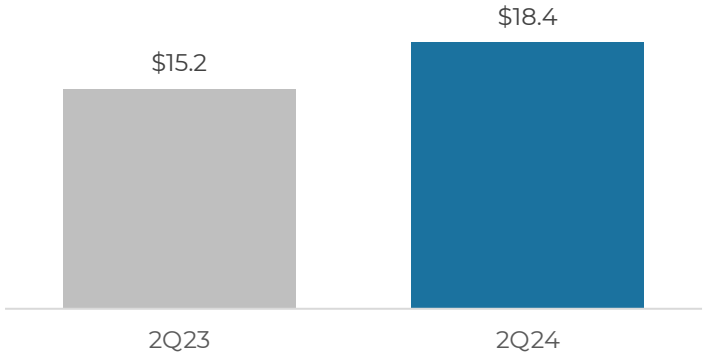

Capital allocation priorities include debt reduction, organic investments in IP; and opportunistic investments in complementary, immediately accretive bolt-on acquisitions

$18.4 million of cash and availability under credit facility as of 6/30/24, an increase of more than $3 million y/y

Net leverage of 1.1x as of 6/30/24, down from 2.0x in the PY period

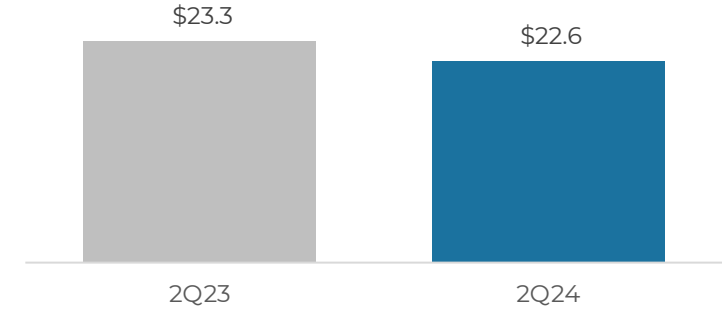

Cash and LOC Availability at Quarter-End

($MM)

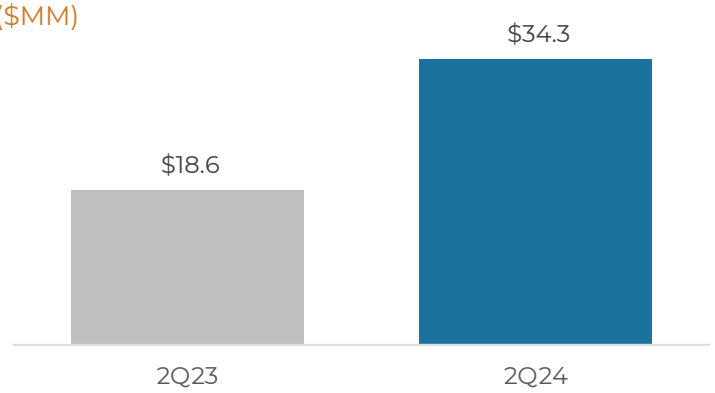

Net Debt Outstanding[1]

($MM)

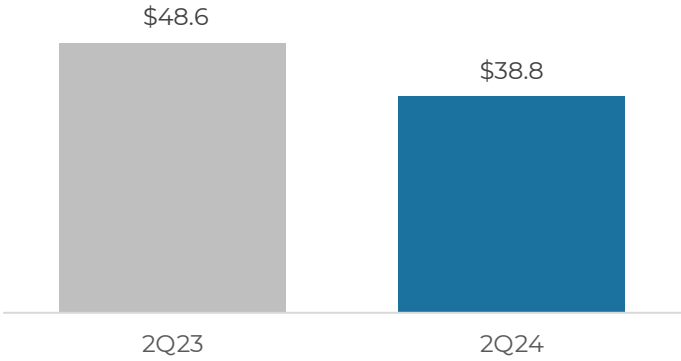

Total Net Operating Working Capital

($MM)

Total Inventory

($MM)

(1) On August 4, 2022, Broadwind entered into a $35.0 million Senior Secured Revolving Credit Facility (the "Credit Facility"), including an optional $10.0 million accordion feature, and a $7.6 million Senior Secured Term Loan (the "Term Loan). The Term Loan bears interest at SOFR +2.5%; the Credit Facility bears interest at SOFR +2.0-2.5%, subject to the level of excess availability on the Credit Facility.

THIRD QUARTER 2024 FINANCIAL GUIDANCE

As of August 13, 2024

Introducing Third Quarter 2024 revenue and Adjusted EBITDA guidance

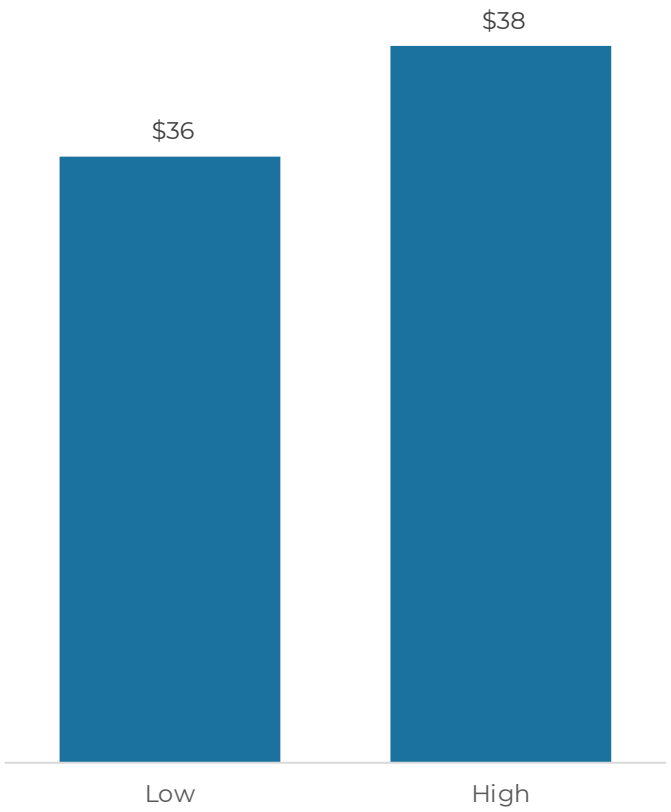

Guidance supported by targeted commercial growth within high-value, growth-oriented fabrications markets, together with a targeted focus on asset optimization and operational discipline

Assumes approximately 25% utilization at tower facilities in the third quarter 2024, as if no new tower orders were received

Anticipate early indications of a recovery in onshore tower demand in late 2024

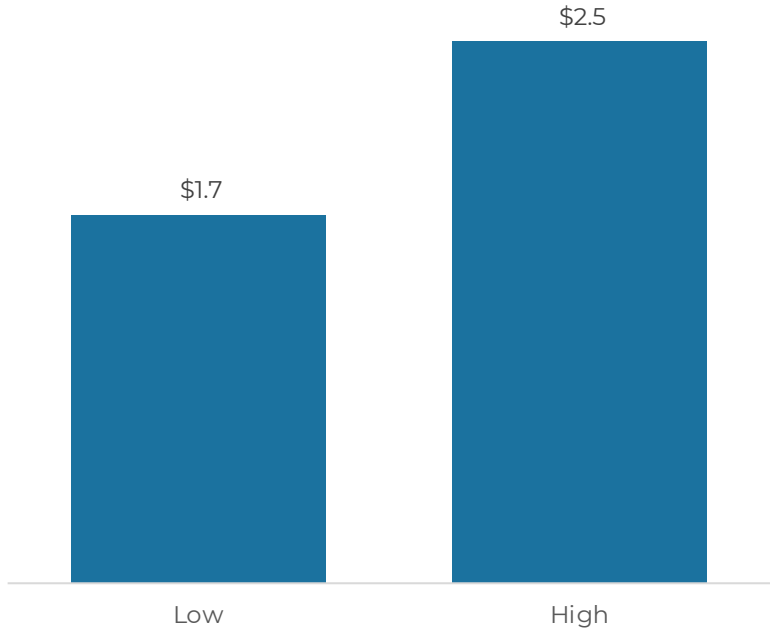

Total Revenue Range

($MM)

Total Adjusted EBITDA Range

($MM)

APPENDIX

CORPORATE OVERVIEW

We support the world's energy transition as a leading independent producer of wind towers, gearing, custom fabrications, clean fuel processing systems and supply chain solutions

Broadwind is a precision manufacturer of technologically advanced, high-value components and solutions for industrial clients.

We are one of the leading independent wind tower manufacturers in the United States.

Our most significant business serves the US domestic wind energy industry, with primary production facilities that are strategically located to meet our customers' project needs.

We also serve industrial customers in a diversified set of industrial markets including oil & gas, industrial, power generation, mining and construction.

This strategic diversification allows us to leverage our manufacturing expertise to improve capacity utilization, expand our customer base and balance our exposure to the volatile demand in the US wind energy industry.

OUR BUSINESS

Building a platform sustained, profitable growth and long-term value creation

What we do

Precision manufacturing within wind sector and other diverse end-markets

Heavy Fabrications Segment	We provide large complex and precision fabrications to customers in a broad range of industrial markets, as well as proprietary clean fuel processing systems. Key products include wind towers, PRS units and industrial fabrications, which include components for mining, construction, marine, material handling and other applications	66% of 2023 Revenue
Gearing Segment	We provide custom gearing, gearboxes and heat treat services to a broad set of customers in diverse markets, including oil and gas production, surface and underground mining, wind energy, steel, material handling and other infrastructure markets	22% of 2023 Revenue
Industrial Solutions Segment	We provide supply chain solutions, inventory management, kitting and assembly services, primarily serving the combined cycle natural gas turbine and solar power generation markets	12% of 2023 Revenue

Why we win

Unique Value Proposition

- Proven engineering, product development and technical capabilities
- Expertise in manufacturing large, complex fabrications, gearing, and proprietary clean fuel processing systems
- Integrated design, sourcing, fabrication, machining, coating, assembly
- Stringent testing and quality capabilities
- Targeted, multi-industry focus

Our manufacturing base

Established Original Equipment Manufacturer ("OEM") Relationships

KONECRANES

INFLATION REDUCTION ACT IMPACT BENEFIT

At full utilization, IRA could provide up to ~$30 million in incremental annual gross profit

The IRA serves to materially enhance tower production economics

The IRA, which passed into law in 2022, provides critical industries, including those supporting the energy transition, with tax credits designed to accelerate a generational shift in the energy production mix from fossil fuels toward renewable energy, including wind.

Included within **section 45x** of the IRA is a provision for a new advanced manufacturing tax credit

Theoretical IRA Benefit to Broadwind

Quantifying potential impact of the 45x advanced manufacturing credit

Annual tower production @ 100% utilization[1]	325 towers
Average MW per Tower[2]	3.1 avg. MW per tower
Total Watts per MW	1,000,000
Cents Per Watt[3]	$0.03 per watt
Financial benefit of 45x credit per MW[4]	$30,000
Average benefit per tower[5]	$93,000
Theoretical annual gross profit benefit to Broadwind	**$30 million**

(1) Broadwind has an estimated 1,300 sections of annual optimal tower capacity; assuming each tower is four sections, the Company has the theoretical capacity to produce up to 325 towers
(2) Common OEM platforms range from 2.8 to 3.4 MW per tower
(3) As defined in the Inflation Reduction Act of 2022, section 45x (B)(2)(A)(0)
(4) $0.03 x 1,000,000 watts per MW
(5) Assuming average MW per tower of 3.1

Broadwind is prepared to leverage the benefits of the IRA to create shareholder value

PASSAGE OF IRA SUPPORTS MULTI-YEAR INVESTMENT IN WIND

Inflation Reduction Act of 2022 supports multi-decade decarbonization of domestic energy grid

IRA provides transformative, long-term funding for the entire energy ecosystem, including wind and solar

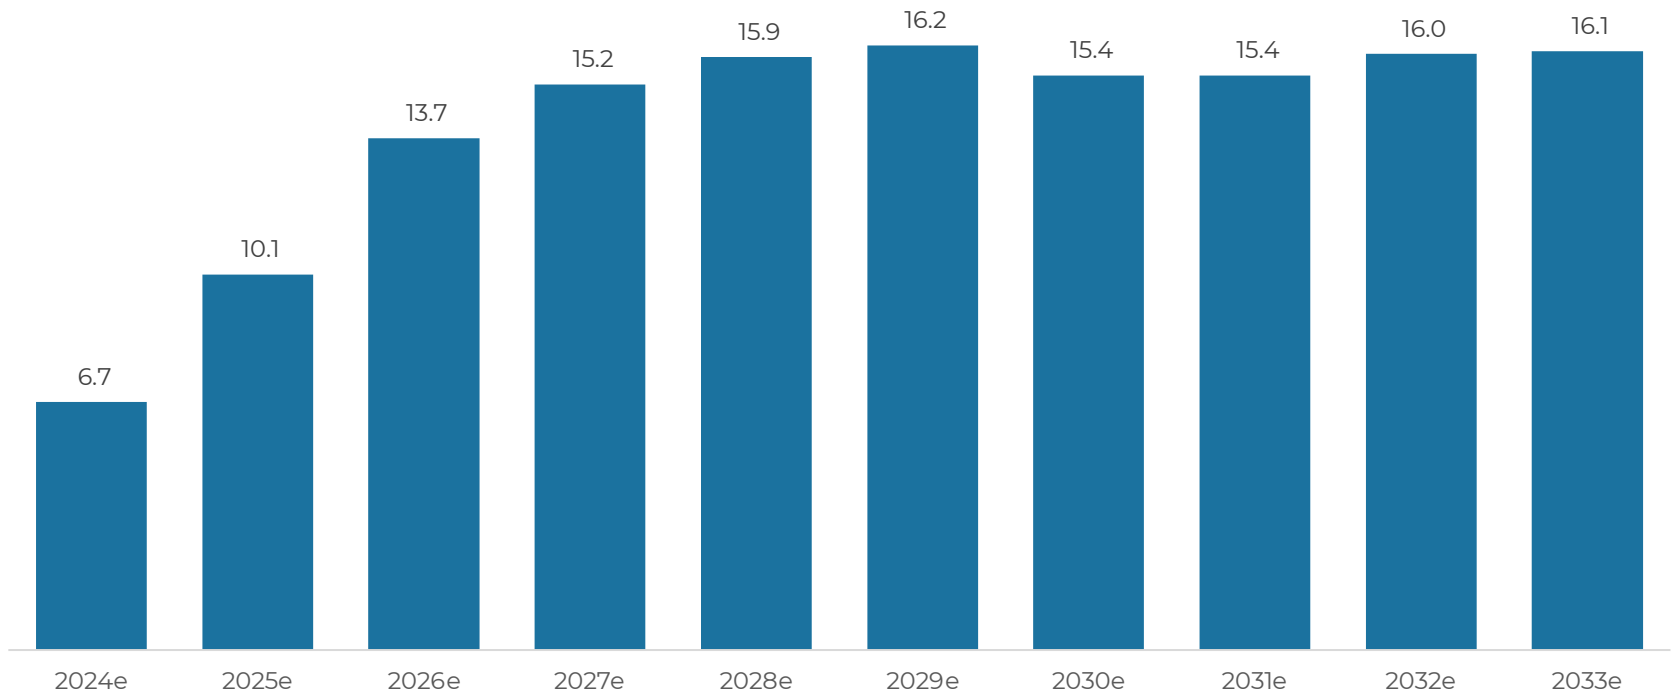

The passage of the IRA extends tax credit availability into the mid-2030s

The wind industry is poised to capitalize on available domestic content tax credits, providing long-term support for multi-year investments in both onshore and offshore wind development

We will seek to drive growth in excess of domestic onshore installation activity growth

United States Onshore Wind Development Forecast[1]

(Total GW Installed Annually, Includes Repowering (2024e-2033e)

(1) Wood Mackenzie Power & Renewables – Wind Power Outlook – **Updated June 2024**

Broadwind is uniquely positioned to take advantage of the increased development activity driven by the IRA. Our Board and Management have deep knowledge of the wind market.
