(1) This non-GAAP adjustment removes the compensation expense resulting from market valuation changes in the Company's deferred compensation plans' liability and the related net gains/losses on investments designated as an economic hedge against the related liability. Amounts deferred under the deferred compensation plans are adjusted for appreciation/depreciation of investments chosen by participants. The Company believes it is useful to offset the non-operating investment income or loss realized on the hedges against the related compensation expense and remove the net impact to help readers understand the Company's core operating results and to

5

improve comparability from period to period.

- (2) This non-GAAP adjustment removes the impact that the Consolidated Fund(s) had on the Company's GAAP consolidated statements of income. Specifically, the Company adds back the operating expenses and subtracts the investment income of the Consolidated Fund(s). The adjustment to net operating income represents the operating expenses of the Consolidated Fund(s), net of the elimination of related management and administrative fees. The adjustment to net income attributable to common shareholders represents the net income of the Consolidated Fund(s), net of redeemable non-controlling interests. The Company believes removing the impact of the Consolidated Fund(s) helps readers understand its core operating results and improves comparability from period to period.
- (3) This non-GAAP adjustment represents the net gains or losses earned on the Company's non-consolidated investment portfolio that are not designated as economic hedges of the Deferred Compensation Plans' liability, non-consolidated seed investments, and other investments. The Company believes adjusting for these non-operating income or loss items helps readers understand the Company's core operating results and improves comparability from period to period.
- (4) The income tax expense impacts were calculated and resulted in the overall non-GAAP effective tax rates of 28.4% for the three months ended June 30, 2025, 29.2% for the three months ended June 30, 2024, 27.8% for the six months ended June 30, 2025 and 27.5% for the six months ended June 30, 2024.

The Company does not recommend that investors consider non-GAAP financial measures alone, or as a substitute for, financial information prepared in accordance with GAAP.
