Barrick se Joint à la Côte d'Ivoire pour Combattre le Covid-19

Abidjan, Côte d'Ivoire – Le 9 avril 2020 – Le Directeur de Barrick Gold Corporation pour la Côte d'Ivoire, Bodiél N'Diaye, a présenté aujourd'hui une contribution de plus de \$1.3 million au Ministre des Mines et de la Géologie Jean Claude Kouassi pour soutenir la Côte d'Ivoire dans sa campagne contre la pandémie de Covid-19. Ce don va servir à soutenir l'action médicale et sociale et comprend la fourniture d'équipements de protection et de matériels sanitaires.

\$850,000 de ce montant seront alloués au niveau national, \$320,000 au niveau régional et \$135,000 iront au district et aux communautés riveraines à la mine de Tongon.

Barrick détient et exploite la mine d'or de Tongon en Côte d'Ivoire et partage une longue histoire de partenariat avec le gouvernement et les communautés locales, y compris dans le domaine de la santé communautaire.

N'Diaye a déclaré que de vastes mesures de prévention et de contrôle avaient déjà été mises en œuvre à Tongon, mais compte tenu de leur engagement sur le long terme dans le pays et de l'ampleur potentielle de la pandémie, Barrick a jugé nécessaire d'apporter également une contribution au niveau national.

Cautionary Statement on Forward-Looking Information

Certain information contained in this press release, including any information as to Barrick's strategy or future financial or operating performance, constitutes "forward-looking statements". All statements, other than statements of historical fact, are forward-looking statements. The words "support", "will", "contribute", "prevent", "control" and similar expressions identify forward-looking statements. In particular, this press release contains forward-looking statements including, without limitation, with respect to financial support and preventative measures implemented by Barrick's Tongon mine to mitigate the impact of the Covid-19 pandemic in Côte d'Ivoire, including by providing support at the national and regional levels as well as to district and community stakeholders.

Forward-looking statements are necessarily based upon a number of estimates and assumptions; including material estimates and assumptions related to the factors set forth below that, while considered reasonable by Barrick as at the date of this press release in light of management's experience and perception of current conditions and expected developments, are inherently subject to significant business, economic, and competitive uncertainties and contingencies. Known and unknown factors could cause actual results to differ materially from those projected in the forward-looking statements, and undue reliance should not be placed on such statements and information. Such factors include, but are not limited to: the risks associated with Covid-19 and other infectious diseases presenting as major health issues; failure to comply with environmental and health and safety laws and regulations; operating or technical difficulties in connection with mining or development activities, including geotechnical challenges, and disruptions in the maintenance or provision of required infrastructure and information technology systems; changes in national and local government legislation, taxation, controls, or regulations and/or changes in the administration of laws, policies, and practices, expropriation or nationalization of property and political or economic developments in Côte d'Ivoire; lack of certainty with respect to foreign legal systems, corruption and other factors that are inconsistent with the rule of law; risks associated with illegal and artisanal mining; risk of loss due to acts of war, terrorism, sabotage and civil disturbances; timing of receipt of, or failure to comply with, necessary permits and approvals; litigation and legal and administrative proceedings; damage to the Barrick's reputation due to the actual or perceived occurrence of any number of events, including negative publicity with respect to the Barrick's handling of environmental matters or dealings with community groups, whether true or not; contests over title to properties, particularly title to undeveloped properties, or over access to water, power, and other required infrastructure; employee relations including loss of key employees; increased costs and physical risks, including extreme weather events and resource shortages, related to climate change; and availability and increased costs associated with mining inputs and labor. In addition, there are risks and hazards associated with the business of mineral exploration, development, and mining, including environmental hazards, industrial accidents, unusual or unexpected formations, pressures, cave-ins, flooding, and gold bullion, copper cathode, or gold or copper concentrate losses (and the risk of inadequate insurance, or inability to obtain insurance, to cover these risks).

Many of these uncertainties and contingencies can affect our actual results and could cause actual results to differ materially from those expressed or implied in any forward-looking statements made by, or on behalf of, us. Readers are cautioned that forward-looking statements are not guarantees of future performance. All of the forward-looking statements made in this press release are qualified by these cautionary statements. Specific reference is made to the most recent Form 40-F/Annual Information Form on file with the SEC and Canadian provincial securities regulatory authorities for a more detailed discussion of some of the factors underlying forward-looking statements, and the risks that may affect Barrick's ability to achieve the expectations set forth in the forward-looking statements contained in this press release.

Barrick disclaims any intention or obligation to update or revise any forward-looking statements whether as a result of new information, future events or otherwise, except as required by applicable law.
