Notes

The figures presented in this press release, including the cash and debt balances, and the revenues and costs of sales, have not been audited and are subject to change. As the Company has not yet finished its quarter end procedures, the anticipated financial information presented in this press release is preliminary, subject to quarter end adjustments, and may change materially.

(1) Gold Equivalent Ounces

GEOs are calculated on a quarterly basis and include royalties and streams. Silver and copper earned from royalty and stream agreements are converted to gold equivalent ounces by multiplying the silver ounces or copper tonnes earned by the average silver price or copper price for the period and dividing by the average gold price for the period. Cash royalties and other metals and commodities are converted into gold equivalent ounces by dividing the associated revenue earned by the average gold price for the period.

Average Metal Prices

	Three months ended June 30	
	2026	2025
Gold[(i)]	$4,506	$3,280
Silver[(ii)]	$73.15	$33.68

(ii) The London Bullion Market Association's price in U.S. dollars per ounce.
(iii) The London Metal Exchange's price in U.S. dollars per tonne.

(2) Non-IFRS Measures

Cash margin in dollars and in percentage of revenues are non-IFRS financial measures. Cash margin (in dollars) is defined by OR Royalties as revenues less cost of sales (excluding depletion). Cash margin (in percentage of revenues) is obtained by dividing the cash margin (in dollars) by the revenues.

Management uses cash margin in dollars and in percentage of revenues to evaluate OR Royalties' ability to generate positive cash flow from its royalty, stream and other interests. Management and certain investors also use this information, together with measures determined in accordance with IFRS Accounting Standards such as gross margin and operating cash flows, to evaluate OR Royalties' performance relative to peers in the mining industry who present these measures on a similar basis. Cash margin in dollars and in percentage of revenues are only intended to provide additional information to investors and analysts and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS Accounting Standards. They do not have any standardized meaning under IFRS Accounting Standards and may not be comparable to similar measures presented by other issuers.

A reconciliation of the cash margin (in thousands of dollars and in percentage of revenues) is presented below:

	Three months ended June 30	
	2026	2025
Revenues	$97,820	$60,364
