Appendix: Reconciliations of GAAP Measures to Non-GAAP Measures

The following measures are used by the Company's management to evaluate financial performance against historical results and establish targets on a consolidated basis. A number of these measures are components of net income or the balance sheet but, in some cases, are not based on accounting principles generally accepted in the United States of America (non-GAAP) under applicable SEC rules because they are not displayed as separate line items in the Consolidated Statements of Operations or the Consolidated Balance Sheets or are not required to be disclosed in the Notes to the Consolidated Financial Statements or, in some cases, there is inclusion or exclusion of certain items not ordinarily included or excluded in accordance with accounting principles generally accepted in the United States of America (GAAP). Reconciliations of these measures to the most comparable GAAP measures also follow.

In the opinion of the Company's management, a discussion of these measures provides investors, financial analysts, rating agencies and other financial statement users with a better understanding of the significant factors that comprise the Company's periodic results of operations and how management evaluates the Company's financial performance. Internally, the Company's management uses these measures to evaluate performance against historical results, to establish financial targets on a consolidated basis and for other reasons, which are discussed below.

Some of these measures exclude net investment gains (losses), net unrealized investment gains (losses) on fixed maturity securities and net reserve remeasurements attributable to discount rates which can be significantly impacted by both discretionary and other economic factors and are not necessarily indicative of operating trends.

An explanation of these measures is contained in the Glossary of Selected Terms included as an exhibit in the Company's reports filed with the SEC.

Other companies may calculate these measures differently, and, therefore, their measures may not be comparable to those used by the Company's management.

(1) Excludes investment income on commercial mortgage loan funds.

(2) Represents the carrying amount of total investment portfolio as presented in the Consolidated Balance Sheets adjusted to exclude the carrying amount of FHLB funding agreements, the carrying amount of limited partnership interests (excluding the carrying amount of commercial mortgage loan funds) and gross unrealized investment gains(losses) on fixed maturity securities.

(3) For each of the three month periods presented, investment yields are calculated by annualizing the result of year-to-date net investment income divided by the average quarter-end and beginning of quarter carrying amount of invested assets. For the periods ended December 31, 2022 and 2021 presented, investment yields are calculated by (i) summing the investment yields for each respective three month period applicable to the period and (ii) dividing that sum per the calculation in (i) by four.

(4) Investment yield on fixed income portfolio, after tax - annualized is calculated using the effective tax rate in effect for each applicable period.
