

## NEWS RELEASE

# Marinus Pharmaceuticals Announces Inducement Grants Under Nasdaq Listing Rule 5635(c)(4)

9/9/2021

RADNOR, Pa.--(BUSINESS WIRE)-- **Marinus Pharmaceuticals, Inc.** (Nasdaq: MRNS), a pharmaceutical company dedicated to the development of innovative therapeutics to treat seizure disorders, today announced the grant of inducement awards to five new employees. The Compensation Committee of the Board of Directors of Marinus approved the grant of non-qualified stock options to purchase an aggregate of 14,313 shares of its common stock (the "Common Stock") as inducements material to the employees entering into employment with the Company in accordance with Nasdaq Listing Rule 5635(c)(4).

These stock option grants have an exercise price of \$12.54 per share, which is equal to the closing price of the Common Stock on September 7, 2021 (date of grant for such stock options). All of the stock options will vest and become exercisable as to 25% of the underlying shares on the one-year anniversary of the applicable employee's start date of employment, and will vest and become exercisable as to the remaining 75% of the underlying shares of Common Stock in 36 equal monthly installments at the end of each month following such anniversary, subject to the applicable employee's continued employment with Marinus on such vesting dates. The stock options were granted as an inducement material to each of the employees entering into employment with Marinus in accordance with Nasdaq Listing Rule 5635(c)(4), and are subject to the terms and conditions of the applicable award agreement covering such grant.

## About Marinus Pharmaceuticals

Marinus Pharmaceuticals, Inc. is a pharmaceutical company dedicated to the development of innovative therapeutics to treat seizure disorders. Ganaxolone is a positive allosteric modulator of GABAA receptors that acts on a well-characterized target in the brain known to have anti-seizure, antidepressant and anti-anxiety effects.

Ganaxolone is being developed in IV and oral dose formulations intended to maximize therapeutic reach to adult and pediatric patient populations in both acute and chronic care settings. Marinus completed the first ever Phase 3 pivotal trial in children with CDKL5 deficiency disorder last year, is planning to conduct a Phase 3 trial in tuberous sclerosis complex, and a Phase 3 trial in refractory status epilepticus is ongoing.
