Axos Financial's Three Business Segments Provide the Foundation For Sustained Long-Term Growth

Investment Thesis

- Diverse mix of asset, deposit, and fee income reduces risk and provides multiple growth opportunities in varying environments
- Differentiated retail digital strategy from "online savings banks" or fin-tech competitors
- Structural cost advantage vs. traditional banks
- Differentiated distribution strategy
- New business initiatives will generate incremental growth
- Universal Digital Banking Platform and Enterprise Technology stack provide operating leverage opportunity
- Technology synergies among business segments reduce overall cost of growth strategy

Our Model is Built for Increased Digital Interactions

COVID-19 Has Accelerated Adoption of Digital Banking and Wealth Management

Consumer Banking

- Convenience and superior user experience keys to long-term success
- Effective use of customer data and segmentation reduces customer acquisition costs and increases cross-sell
- Control of front- and back-end connectivity to technology stack provides cost and time-to-market advantages
- UDB allows Axos to continuously add new self-service tools and value-added services within our digital banking platform

Commercial Banking

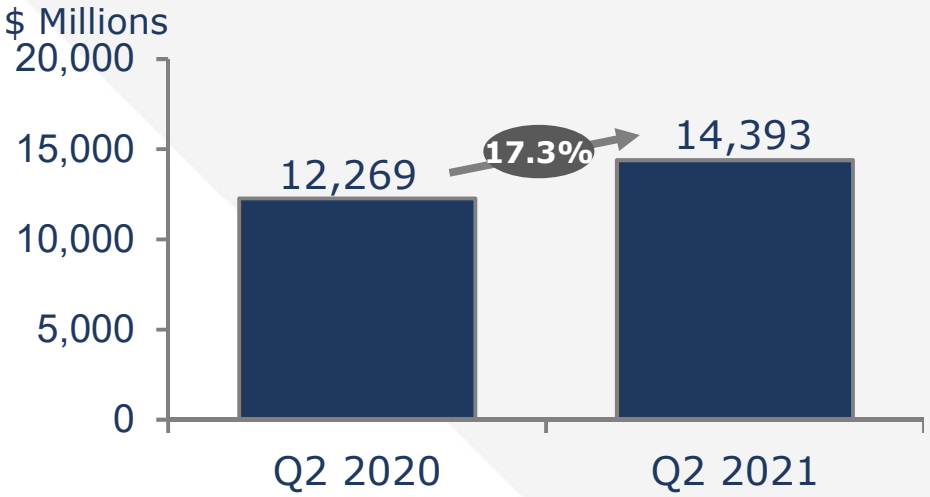

- Providers that integrate banking with specialized software to serve specific customer segments will gain market share
- Axos Fiduciary Services supports trustees and fiduciaries nationwide through software + services model
- Winning cash/treasury management accounts through > automation and custom API integration
- Regional sales leaders supported by centralized service team creates a more efficient and scalable model

Securities

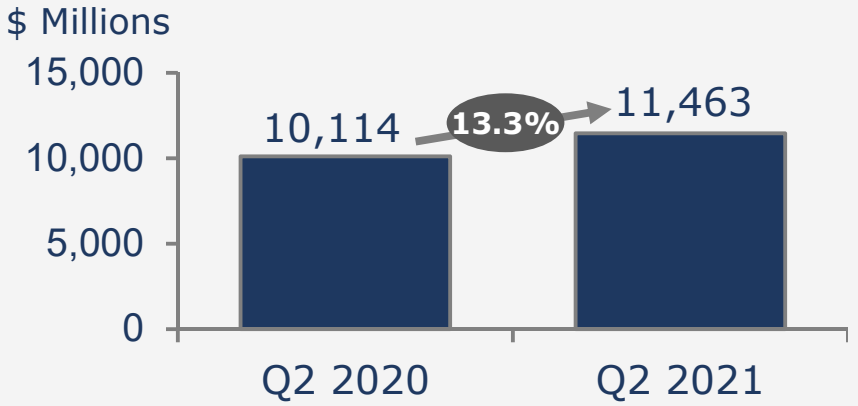

- Consumers across all age and income demographics want to manage their finances through a centralized, digital platform
- Independent RIAs and IBDs need banking services to compete with money center banks and large broker-dealers
- Owning clearing, custody, and direct-to-consumer digital wealth capabilities provides opportunities to serve consumers with incremental services at favorable economics

Fiscal 2021 Second Quarter Highlights Compared with Fiscal 2020 Second Quarter

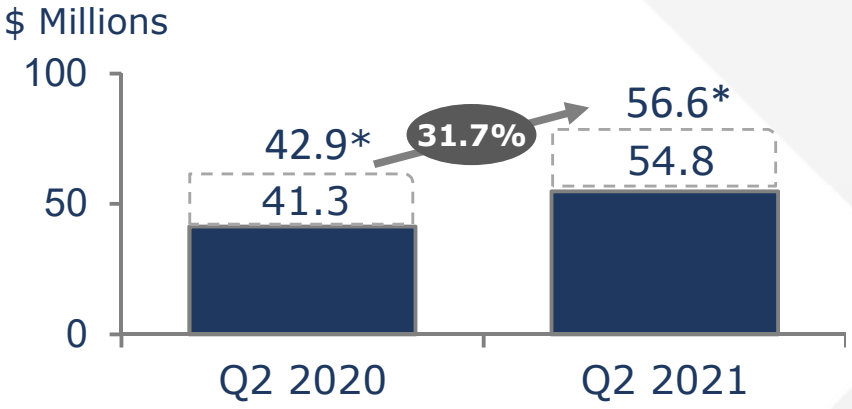

Asset Growth

Our recommendation engine already has the capability to integrate a wide variety of financial offerings: savings, credit, purchases, and more

Key Goals of Universal Digital Bank

Personalization	› Increase chances of offering right product at the right time and place › Personalization is the right antidote for too much choice, too much content, and not enough time
Self-Service	› Eventual artificial intelligence tools assist sale of banking products such as deposits, loans, and mortgages › Products optimized by channel, recipient and journey › Self service saves time and cost (e.g., activate and de-activate debit-card in platform, send wires via self-service)
Facilitate Partnerships	› Easy integration of third-party features (e.g., biometrics) › Access to value added tools (e.g., robo-advisory, automated savings features) either proprietary or third party › Enable creative customer acquisition partners
Customizable Experience	› Provide holistic and interactive and intuitive design experience › Integrate online experience with other channels
Cross-Sell	› Artificial intelligence and big data credit models enable quick credit decisions › Customized product recommendations based upon analytical determination of need

Personalization Solution Will Increase Consumer Engagement and Lifetime Value

Goal is to present customers with customized and relevant offers at the right time via the right channel

As We Fully Digitize All Front-End Customer Interactions, Operational Efficiency Gains Also Become Possible

Online Banking Customer Interaction

- Provide compelling customer value proposition to use online banking
- Employ intelligent, personalized, automated campaigns to develop customer confidence in our messages
- Utilize multiple channels to deliver information that reflects customer preferences

Customer Self Service

- Expand digital channels and leverage omnichannel AI Hub across multiple channels, to streamline interactions
  - Easy to use self help via intelligent, automated platforms such as conversational.ai to make it easy to get what's wanted, when it's wanted, anytime, anywhere
  - Customer seamlessly switches from one channel to another e.g. IVR, Chatbot, Facebook Messenger, etc.

Operational Efficiency

- Customer centric operational efficiencies reduce cost, while accelerating delivery of customer requests
- Efficiencies are delivered using tools such as our robotic process automation platform, or low code platform to automate high volume, repetitive processes

Holistic Credit Risk Management
