## Supermicro Surpasses US\$2 Billion in Cumulative Revenue Since Founding

SAN JOSE, California, May 08, 2008 (PR Newswire Europe via COMTEX News Network) -- Application-Optimized Server Leader Celebrates Over 14 Consecutive Years of Profitability and Consistent Growth

Super Micro Computer, Inc. (Nasdaq: SMCI), a leader in application-optimized, high performance server solutions, today announced that the company has surpassed the US\$2 billion milestone in cumulative sales revenue since it was founded in 1993. Supermicro's annual growth rate during the last five fiscal years was several times faster than the server industry growth rate, as the company has consistently posted double-digit growth figures year after year.

"With our annual run rate now over US\$0.5 billion, we are squarely focused on our next milestone of US\$1 billion in annual revenue," said Charles Liang, CEO and president of Supermicro. "As the technology leader in performance-per-watt (up to 290GFLOPS/kW\*) server solutions, Supermicro has never been stronger than it is today. With a 57% growth in R&D manpower over the last 12 months now in place, we are offering the strongest product lineup in our history. As a result of this worldwide infrastructure growth, Supermicro is quickly increasing its business with Fortune Global 100 companies."

The company's impressive track record of 14 consecutive years of profitability and consistent growth can be attributed to Supermicro's Server Building Block Solutions(R), its dedicated and talented engineering teams, the visionary leadership of Supermicro management as well as the close customer and partner relationships that the company continues to build and nurture.

Furthermore, as the chair of the Climate Savers Computing Initiative (CSCI) APAC region, Supermicro is strongly committed to the CSCI mission to reduce worldwide computer power consumption by 50 percent by 2010. As a leader in green server technology, Supermicro offers up to 93%\* efficiency power supplies, high-efficiency cooling designs, low-voltage memory support, and high-efficiency voltage regulator modules (VRMs) to help customers minimize their total cost of ownership (TCO).

Supermicro's current portfolio of Server Building Block Solutions(R) includes over 570 server boards, over 1300 chassis SKUs, hundreds of servers, power supplies and accessories, as well as an attractive selection of user-friendly server management solutions. With superior performance-per-watt, these solutions deliver exceptional performance, cost savings and energy savings for the ultimate in Earth-Friendly Computing(TM).
