Century Aluminum Company

3rd Quarter Earnings Call

November 8, 2023

Cautionary Statement

Certain statements in this presentation, and those made by Century Aluminum Company management on the quarterly conference call, relate to future events and expectations and are "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Words such as "believe," "expect," "hope," "target," "anticipate," "intend," "plan," "seek," "estimate," "potential," "project," "scheduled," "forecast" or words of similar meaning, or future or conditional verbs such as "will," "would," "should," "could," "might," or "may" often identify forward-looking statements. All statements other than statements of historical fact are forward-looking statements, including, without limitation, statements regarding our outlook, assumptions, projections, forecasts or trend descriptions. These statements do not guarantee future performance and speak only as of the date they are made, and we do not undertake to update our forward-looking statements, whether as a result of new information, future events, or otherwise. Where we express an expectation or belief as to future events or results, such expectation or belief is expressed in good faith and is believed to have a reasonable basis. However, our forward-looking statements are based on current expectations and assumptions that are subject to risks and uncertainties which may cause actual results to differ materially from future results expressed, projected or implied by those forward-looking statements. Important factors that could cause actual results and events to differ from those described in such forward-looking statements can be found in the risk factors and forward-looking statements cautionary language contained in our Annual Report on Form 10-K, quarterly reports on Form 10-Q and in other filings made with the Securities and Exchange Commission ("SEC"). Although we have attempted to identify material factors that could cause actual results or events to differ from those described in such forward-looking statements, there may be other factors that could cause actual results or events to differ from those anticipated, estimated or intended. Many of these factors are beyond our ability to control or predict. Given these uncertainties, investors are cautioned not to place undue reliance on our forward-looking statements.

Our forward-looking statements include, without limitation, statements with respect to: future global and domestic financial and economic conditions; the outlook for the global aluminum and alumina markets including benchmark and premium pricing levels; our assessment of U.S. and European energy and power markets; costs associated with our other key raw materials, and supply and availability of those key raw materials, including power (and related natural gas and coal); our assessment of power price and availability for our U.S. and European operations including the likelihood and extent of any power curtailments; the impact of the wars in Ukraine and Israel including any related impacts on global energy markets and/or any sanctions and export controls targeting Russia and businesses tied to Russia and to sanctioned entities and individuals, including any possible impact on our business, operations, financial condition, results of operations and global supply chains; the future financial and operating performance of Century and its subsidiaries; our ability to successfully manage market risk and to control or reduce costs; our plans and expectations with respect to future operations of the Company and its subsidiaries, including any plans and expectations to curtail or restart production, including the expected impact of any such actions on our future financial and operating performance; our plans and expectations with regards to future operations of our Mt. Holly smelter, including our expectations as to the restart of curtailed production at Mt. Holly, including the timing, costs and benefits associated with restarting curtailed production; our plans with regards to future operations of our Hawesville smelter, including our expectations as to the timing, costs and benefits associated with restarting curtailed production; our plans and expectations with regards to the Grundartangi casthouse project, including our expectations as to the timing, costs and benefits associated with the Grundartangi casthouse project; our plans and expectations with respect to the acquisition of a 55% interest in Jamalco, including our expectations as to the costs and benefits associated with this transaction; our ability to successfully obtain and/or retain competitive power arrangements for our operations; our ability to qualify for and realize potential tax benefits under the Inflation Reduction Act of 2022; our ability to access existing or future financing arrangements and the terms of any such future financing arrangements; our ability to repay or refinance debt in the future; and other factors described in more detail in our Annual Report on Form 10-K, quarterly reports on Form 10-Q and in our other SEC filings.

In addition, throughout this presentation, we use non-GAAP financial measures. Non-GAAP financial measures should not be considered as alternatives to the measures derived in accordance with U.S. GAAP. Non-GAAP financial measures have important limitations as analytical tools, and you should not consider them in isolation or as substitutes for results as reported under U.S. GAAP. Reconciliations to the most comparable GAAP financial measures can be found in the Appendix of today's presentation.

Company and Market Update

Industry Fundamentals

- Strong Chinese demand growth, mainly driven by solar and EV production
- ~1.2 million MTs annual Chinese capacity cuts announced; third consecutive year of winter production cuts
- Near-term RoW demand remains soft, impacting delivery premiums in U.S. and Europe
- Global inventories remain at historical lows

Costs

- Indiana Hub prices QTD ~$34/MWh; down > 50% from prior year
- Nord Pool prices QTD ~$35/MWh; hedged 95% at $30/MWh
- Coke prices QTD ~$495/MT U.S. Gulf FOB basis; down ~30% from prior year
- Caustic Soda and Nat Gas prices down > 50% from prior year

Operations

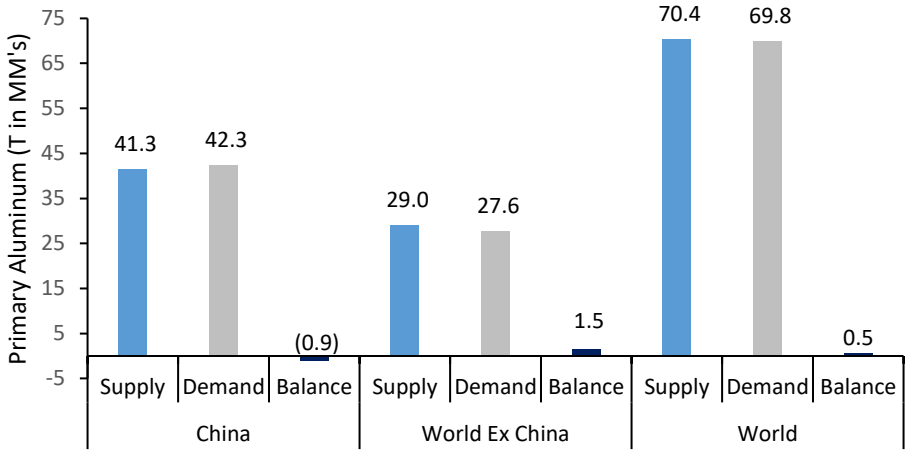

- Jamalco was disrupted by an equipment failure; returned to targeted production levels by end of October
- Finalized a three-year Mt. Holly power agreement
- All smelters continue operating at targeted utilization levels
- Iceland casthouse remains on schedule

Financial

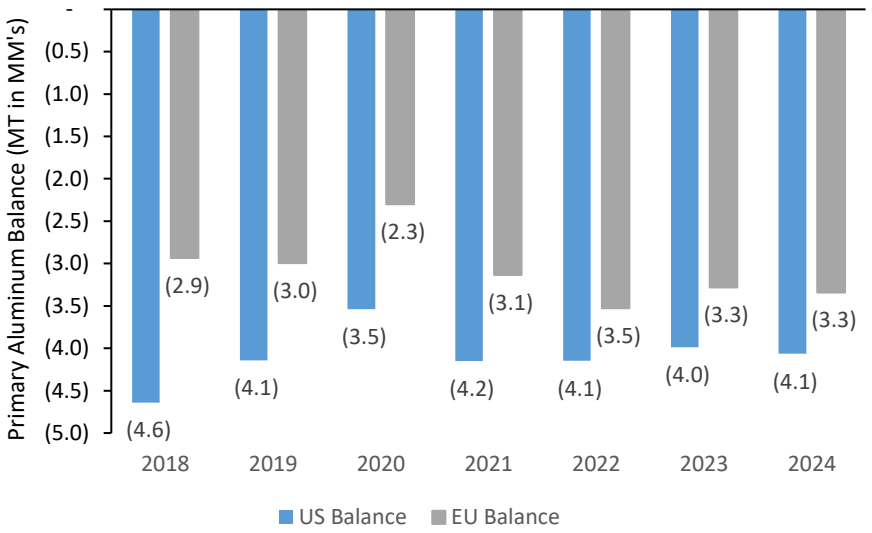

- Completed Mt. Holly land sale and received ~$26MM in proceeds
- Realized working capital improvements from Jamalco and smelter optimization efforts
- Strong liquidity of $306MM

Appendix

Non-GAAP Financial Measures

Adjusted net income (loss), adjusted earnings (loss) per share, adjusted EBITDA and net debt are non-GAAP financial measures that management uses to evaluate Century's financial performance. These non-GAAP financial measures facilitate comparisons of this period's results with prior periods on a consistent basis by adjusting for items that management does not believe are indicative of Century's ongoing operating performance and ability to generate cash. Management believes these non-GAAP financial measures enhance an overall understanding of Century's performance and our investors' ability to review Century's business from the same perspective as management.

The following slides provide a reconciliation of adjusted net income (loss), adjusted earnings (loss) and adjusted EBITDA to the most directly comparable GAAP financial measure. Non-GAAP financial measures should be viewed in addition to, and not as an alternative for, the Company's reported results prepared in accordance with GAAP. In addition, because not all companies use identical calculations, adjusted net income (loss), adjusted earnings (loss) per share and adjusted EBITDA included in the following slides may not be comparable to similarly titled measures of other companies. Investors are encouraged to review the reconciliations in conjunction with the presentation of these non-GAAP financial measures.

This presentation also provides forward-looking adjusted EBITDA. We do not provide a reconciliation of forward-looking adjusted EBITDA because the most closely comparable GAAP financial measure is not accessible on a forward-looking basis and reconciling information is not available without unreasonable effort due to the inherent difficulty of forecasting and quantifying certain amounts that are necessary for such a reconciliation.

Supplemental Information	Q223	Q323
Pot Relining Expense[1]	8.2	6.5

1) The Company expenses its pot relining costs through Costs of Goods Sold as incurred rather than capitalizing and amortizing over a period of years. For informational purposes, we have provided the amount of pot relining expense incurred for each period. Our calculation of Adjusted EBITDA above does not make any adjustment to exclude these charges.

Capital Allocation

Capital Allocation Framework

Maintain Liquidity Through the Cycle

- $250-$300MM liquidity target
- $300MM net debt target

Sustaining Capital Projects

- $30-35MM in historical sustaining capex per year

Capital Allocation

- Organic growth/Investment capex
- Opportunistic M&A
- Return to shareholders

Current Status Update

	Q323	Target
Liquidity	$306	$250-300
Net Debt[1]	$334	$300

- Organic growth/Investment capex
  - Mt. Holly restart project complete
  - Iceland casthouse commercial production expected Q124
  - U.S. casthouse debottlenecking project
- Opportunistic M&A
  - Jamalco acquisition for $1
  - Will evaluate individual assets on an ongoing basis

When liquidity and net debt targets are met:

- Return to shareholders (repurchases/dividend)
  - Existing share repurchase program in place
  - Compare returns of repurchases against organic growth or M&A opportunities

1) Excludes Iceland casthouse expansion project

Low-Carbon Billet Casthouse Expansion Project

Will produce 150,000 tonnes of Natur-Al™ billet and increase total primary foundry alloy production to 120,000 tonnes

- Construction well underway; commercial production expected Q124
- Investment will allow Iceland to shift more production to Value-Added Products (billet, foundry alloy)
- Green billet capacity of 150,000 tonnes and increase total primary foundry alloy production to 120,000 tonnes
- Natur-Al™ billet Scope 1, 2 and 3 emissions expected to be less than 4t CO_2/t AL, less than 25% of industry average

- $120MM investment
- 100% Green financing; 8-year term facility
- No near-term cash flow needs other than interest due on principal
- Billet premiums have historically been $200 – 250/MT over EDDP
- Growing green premium on low carbon value-added products

- The European market for billet is short approximately 1.0 million tonnes per year
- European CBAM places increasing focus on carbon emissions
- The European extrusion market will need new green sources to emerge in order to prevent carbon leakage
