Century Aluminum Company

4th Quarter Earnings Call

February 20, 2025

Cautionary Statement

Certain statements in this presentation, and those made by Century Aluminum Company management on the quarterly conference call, relate to future events and expectations and are "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Words such as "believe," "expect," "hope," "target," "anticipate," "intend," "plan," "seek," "estimate," "potential," "project," "scheduled," "forecast" or words of similar meaning, or future or conditional verbs such as "will," "would," "should," "could," "might," or "may" often identify forward-looking statements. All statements other than statements of historical fact are forward-looking statements, including, without limitation, statements regarding our outlook, assumptions, projections, forecasts or trend descriptions. These statements do not guarantee future performance and speak only as of the date they are made, and we do not undertake to update our forward-looking statements, whether as a result of new information, future events, or otherwise. Where we express an expectation or belief as to future events or results, such expectation or belief is expressed in good faith and is believed to have a reasonable basis. However, our forward-looking statements are based on current expectations and assumptions that are subject to risks and uncertainties which may cause actual results to differ materially from future results expressed, projected or implied by those forward-looking statements. Important factors that could cause actual results and events to differ from those described in such forward-looking statements can be found in the risk factors and forward-looking statements cautionary language contained in our Annual Report on Form 10-K, quarterly reports on Form 10-Q and in other filings made with the Securities and Exchange Commission ("SEC"). Although we have attempted to identify material factors that could cause actual results or events to differ from those described in such forward-looking statements, there may be other factors that could cause actual results or events to differ from those anticipated, estimated or intended. Many of these factors are beyond our ability to control or predict. Given these uncertainties, investors are cautioned not to place undue reliance on our forward-looking statements.

Our forward-looking statements include, without limitation, statements with respect to: future global and domestic financial and economic conditions; the outlook for the global aluminum and alumina markets including benchmark and premium pricing levels; our assessment of U.S. and European energy and power markets; costs associated with our other key raw materials, and supply and availability of those key raw materials, including power (and related natural gas and coal); our assessment of power price and availability for our U.S. and European operations including the likelihood and extent of any power curtailments; the impact of the wars in Ukraine and in the Middle East, including any sanctions and export controls targeting Russia and businesses tied to Russia and to sanctioned entities and individuals,; our plans and expectations with respect to future financial and operating performance of Century and its subsidiaries including our ability to successfully manage market risk and to control or reduce costs; our plans and expectations with respect to future curtailments or restarts of production, including the expected impact of any such actions on the Company's future financial and operating performance; our plans and expectations with regards to future operations of our Mt. Holly smelter, including our expectations as to the restart of curtailed production at Mt. Holly, including the timing, costs and benefits associated with restarting curtailed production; our plans with regards to future of our Hawesville smelter; our expectations as to the costs and benefits associated with Jamalco's operations; our ability to successfully obtain and/or retain competitive power arrangements for our operations; our ability to qualify for and realize potential tax benefits under the Inflation Reduction Act of 2022; our ability to realize the full amount of the $500 million DOE funding, to raise additional capital through additional grants, incentives, subsidized loans and other debt and equity funding to support construction of a new aluminum smelter; our ability to access existing or future financing arrangements and the terms of any such future financing arrangements; our ability to repay or refinance debt in the future; and other factors described in more detail in our Annual Report on Form 10-K, quarterly reports on Form 10-Q and in our other SEC filings.

In addition, throughout this presentation, we use non-GAAP financial measures. Non-GAAP financial measures should not be considered as alternatives to the measures derived in accordance with U.S. GAAP. Non-GAAP financial measures have important limitations as analytical tools, and you should not consider them in isolation or as substitutes for results as reported under U.S. GAAP. Reconciliations to the most comparable GAAP financial measures can be found in the Appendix of today's presentation.

Company and Market Update

Industry Fundamentals

- Aluminum prices continued upward move in Q4 on tighter global balances
- Alumina supply remained tight, but disruptions are easing in 2025 with spot prices nearing $500/mt
- Global aluminum inventory levels continue to stay near historical lows

Costs

- Low coke, pitch, and energy prices benefitted CENX in Q4 and full year 2024 results
- Indy hub QTD $43/MWh compared to $30/MWh in Q4, driven by normal seasonality
- Incremental opex costs incurred in Q4 at Mt. Holly

Operations

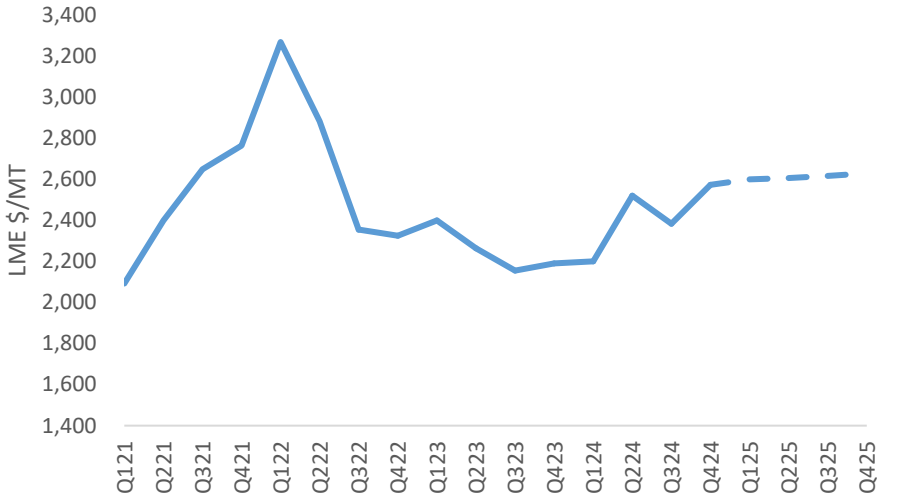

- Jamalco refinery operating at targeted levels; strong start to 2025
- Power curtailment at Grundartangi lifted in February; Grundartangi back to full production levels in March
- U.S. smelters achieved full year volume targets and are running well

Financials

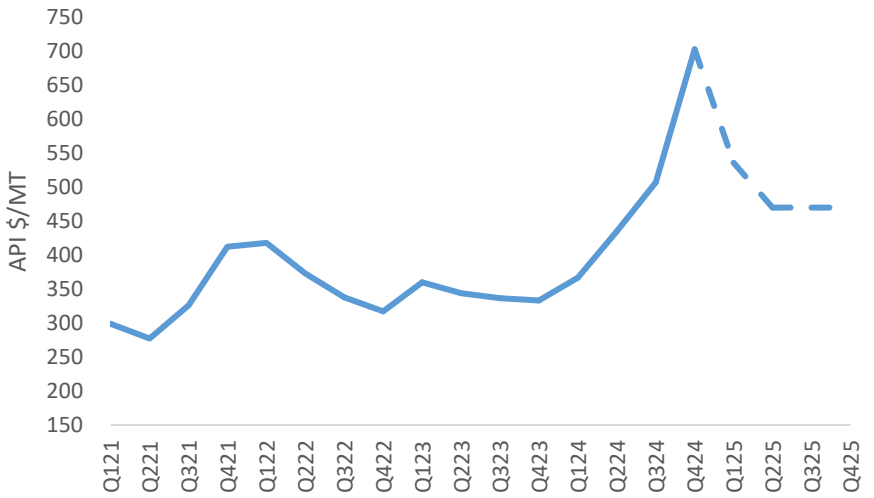

- Recorded $82MM in Q4 Adjusted EBITDA; Recorded $245MM in FY24 Adjusted EBITDA
- Liquidity of $245MM reflects timing of alumina cargoes at quarter-end following Hurricane Beryl port repair
- Section 232 tariff rate to increase to 25% on March 12; MWP spot premium increased to ~40¢ / lb

Appendix

Non-GAAP Financial Measures

Adjusted net income (loss), adjusted earnings (loss) per share, adjusted EBITDA and net debt are non-GAAP financial measures that management uses to evaluate Century's financial performance. These non-GAAP financial measures facilitate comparisons of this period's results with prior periods on a consistent basis by adjusting for items that management does not believe are indicative of Century's ongoing operating performance and ability to generate cash. Management believes these non-GAAP financial measures enhance an overall understanding of Century's performance and our investors' ability to review Century's business from the same perspective as management.

The following slides provide a reconciliation of adjusted net income (loss), adjusted earnings (loss) and adjusted EBITDA to the most directly comparable GAAP financial measure. Non-GAAP financial measures should be viewed in addition to, and not as an alternative for, the Company's reported results prepared in accordance with GAAP. In addition, because not all companies use identical calculations, adjusted net income (loss), adjusted earnings (loss) per share and adjusted EBITDA included in the following slides may not be comparable to similarly titled measures of other companies. Investors are encouraged to review the reconciliations in conjunction with the presentation of these non-GAAP financial measures.

This presentation also provides forward-looking adjusted EBITDA. We do not provide a reconciliation of forward-looking adjusted EBITDA because the most closely comparable GAAP financial measure is not accessible on a forward-looking basis and reconciling information is not available without unreasonable effort due to the inherent difficulty of forecasting and quantifying certain amounts that are necessary for such a reconciliation.

We do not provide a reconciliation of forward-looking Adjusted EBITDA because the corresponding forward-looking GAAP financial measures is not currently available and management cannot reliably predict all the necessary components of such forward-looking GAAP measures without unreasonable effort or expense due to the inherent difficulty of forecasting and quantifying certain amounts that are necessary for such a reconciliation, including adjustments that could be made for restructuring, the variability of our tax rate, the impact of foreign currency fluctuation, and other charges reflected in our historical results. The probable significance of each of these items is high and, based on historical experience, could be material.

Supplemental Information	Q324	Q424
Pot Relining Expense[2]	$ 7.3	$ 9.7

1) This amount includes Century's 100% share of incremental costs incurred due to the impact of Hurricane Beryl at Jamalco. These costs include repair costs of the damaged port, costs of alternative shipping arrangements and fixed costs incurred while alumina production was impeded.

2) The Company expenses its pot relining costs through Costs of Goods Sold as incurred rather than capitalizing and amortizing over a period of years. For informational purposes, we have provided the amount of pot relining expense incurred for each period. Our calculation of Adjusted EBITDA above does not make any adjustment to exclude these charges.

Capital Allocation

Capital Allocation Framework

Maintain Liquidity Through the Cycle

- $250-$300MM liquidity target
- $300MM net debt target

Sustaining Capital Projects[1]

- $45-50 MM in historical sustaining capex per year

Capital Allocation

- Organic growth/Investment capex
- Opportunistic M&A
- Return to shareholders

Current Status Update

	Q424	Target
Liquidity	$245	$250-300
Net Debt	$497	$300

- Organic growth/Investment capex
  - Jamalco investment projects
  - New Century aluminum smelter
  - Secondary billet casthouse
- Opportunistic M&A
  - Will evaluate individual assets on an ongoing basis

When liquidity and net debt targets are met:

- Return to shareholders (repurchases/dividend)
  - Existing share repurchase program in place
  - Compare returns of repurchases/dividends against organic growth or M&A opportunities

1) Includes Century's 55% interest in Jamalco

New Century Aluminum Smelter Project

Investing in the future of U.S. aluminum production with first primary smelter in 50 years, doubling the size of the domestic industry

- The U.S primary aluminum market is short ~4.2 million tonnes per year[1]
- Only 4 operating smelters in the U.S. despite being the 2nd largest consumer
- Strengthens domestic supply chains for critical minerals and national defense base

- Under award with the U.S. Department of Energy to receive up to $500 million in grant funding
- Large scale, modern and efficient smelter primarily powered by carbon-free energy
- Reshoring of production capacity to protect national security interests

- Multiphase planning / construction process; 4-6 year timeline until first metal production
- 5,500 construction jobs and 1,000 permanent, direct jobs
- Near term milestones:
  - Site selection
  - Energy sourcing
  - Detailed engineering work
