NEWS RELEASE

TE Connectivity Showcases Fiber Innovations at 2015 FTTH Connect

2015-06-23

Industry Experts from TE to Present on FTTH Best Practices and Technologies

MINNEAPOLIS, June 23, 2015 /PRNewswire/ -- TE Connectivity (TE), a world leader in connectivity, today announced its participation at **FTTH Connect**, the annual Fiber to the Home (FTTH) Council Americas conference, which is being held from June 29 through July 1 at the Anaheim Convention Center in California.

In its booth #455, TE, a diamond level sponsor of the event, will showcase new fiber innovations in hardened connectivity, fiber distribution solutions, and a new FTTH architecture that slashes the time and cost required to deploy fiber networks. These innovations enable faster, more efficient FTTH network construction by reducing labor and costs associated with splicing, custom cable assemblies, permitting and materials management. As the market pushes for ever-increasing broadband speeds, TE's fiber innovations will help service providers make the transition to Gigabit-level services and beyond.

Industry experts from TE will share their insight on FTTH best practices and methodologies in the following conference track sessions:

- On June 29 from 9:45-10:30 a.m., TE Product Manager Brian Berdan will present "Considerations for Underground FTTH Architectures," a session which introduces some of the technologies and best practices associated with deploying a successful underground FTTH network.

- On June 29 from 12:45-1:30 p.m., TE Business Development Manager Ryan Chappell will present "Changing Deployment Dynamics with Powered Fiber Cable," in which he will discuss the use of powered fiber cable to streamline FTTH deployments.

"FTTH Connect continues to be one of the leading conferences in North America for telecommunications," said David Brown, vice president and chief technology officer of TE Broadband Network Solutions. "As a driver of innovation in the marketplace, TE is proud to share its fiber expertise and technologies with the FTTH Connect community and show customers how to build faster, smarter, more efficient FTTH networks."

ABOUT TE CONNECTIVITY

TE Connectivity (NYSE: TEL) is a $14 billion global technology leader. Our connectivity and sensor solutions are essential in today's increasingly connected world. We collaborate with engineers to transform their concepts into creations – redefining what's possible using intelligent, efficient and high-performing TE products and solutions proven in harsh environments. Our 80,000 people, including 7,500 design engineers, partner with customers in over 150 countries across a wide range of industries. We believe EVERY CONNECTION COUNTS – **www.TE.com**.
