TE Connectivity ranks among Clarivate Top 100 Global Innovators 2025

2025-03-12

List highlights organizations at the forefront of technology research and innovation

GALWAY, Ireland, March 12, 2025 /PRNewswire/ -- TE Connectivity, a world leader in connectors and sensors, has been named among the Clarivate Top 100 Global Innovators, an annual list of organizations that prioritize innovation as a business strategy.

Innovation is a core value at TE, which has been named a Top 100 Global Innovator 12 times since Clarivate created the recognition in 2012. As part of ongoing initiatives to deliver new innovations to customers around the world, TE has more than 15,000 patents granted or pending and invested more than \$750 million in research, development and engineering in the past fiscal year. Additionally, the company last week published its annual **Industrial Technology Index**, a research report that provides the marketplace with insights into how companies around the world are managing critical innovation issues.

"We have a culture at TE that encourages our 9,000 global engineers to consistently bring new ideas to help us be an even stronger partner to our customers, whether it's an iteration that advances technologies to the next level, or a completely new solution," said CEO Terrence Curtin. "Our innovative spirit is a major reason why our customers around the world seek to co-create with us to solve for their technological challenges."

The Top 100 Global Innovators rankings are generated by the Clarivate Center for IP and Innovation Research. Their analyses are underpinned by rigorous research leveraging the proprietary Derwent Strength Index, derived from the Derwent World Patents Index and global patent data to measure the influence of ideas, their success and rarity

and the investment in inventions.

"Being recognized as a Top 100 Global Innovator is a remarkable achievement given the pace of change - since 2000, we've seen an 80-fold increase in the volume of inventions," said Gordon Samson, president of intellectual property at Clarivate. "Competition is more global than ever before, and developments in one region can have a significant global impact. Hyperconnectivity and technological convergence play a pivotal role in driving innovation. The Top 100 organizations target innovation at the deployment and diffusion of technology and knowledge."
