PITTSBURGH

Evoqua is recognized in the Global Water Technologies sector for excellence in growth, innovation, and leadership

PITTSBURGH--(BUSINESS WIRE ^[1])--Evoqua Water Technologies ^[2], an industry leader in mission-critical water treatment solutions, today announced that it has received the 2020 Frost & Sullivan Global Company of the Year Award in the Global Water Technologies category. The company was honored because of its robust revenue growth, dual-pronged approach to solutions and services, comprehensive customer-centric strategy, cutting-edge technological advancements, and strong overall performance in the market.

Frost & Sullivan's Company of the Year Award honors leading industry participants that demonstrate excellence in growth, innovation, and leadership. This distinction, according to the firm, typically translates into superior performance in the following three key areas: demand generation, brand development, and competitive positioning. In addition, the winner delivers on the following two factors that define the Company of the Year Award: visionary innovation and performance and customer impact.

"Anchored by more than a century of experience, Evoqua regularly evaluates its strategies and processes in service of its key focus: transforming water and enriching life. To this end, the company streamlined its organizational structure into two segments—Integrated Solutions and Services and Applied Product Technologies—which leverage technological expertise to provide solutions across the entire water cycle, from influent to effluent," said Fredrick Royan, Vice President-Research, Sustainability and Circular Economy at Frost & Sullivan. "To ensure it continually serves the market with relevant technologies, Evoqua stays abreast of current and emerging challenges and alters its product pipeline when necessary. With its Water One® platform, Evoqua strengthens its predictive maintenance foundation with Internet of Things technology, delivering real-time analytics and remote monitoring capabilities that differentiate it from the competition while delivering unmatched value to customers."

"Proper access to and the utilization of safe, clean water continues to be a challenge for organizations and municipalities across the globe," said Evoqua CEO Ron Keating. "Our team, at Evoqua, delivers a tremendous amount of technology expertise, research and hard work to provide innovative and sustainable solutions creating valuable customer experiences to combat these challenges. We're honored to be recognized for our efforts in each of these distinct areas by Frost & Sullivan as we continue on our journey in providing mission-critical water and wastewater treatment solutions to transform water and enrich life."
