NOTE 1 Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The accompanying financial statements of the Company have been prepared on the basis of accounting practices prescribed or permitted by the Insurance Department of the Commonwealth of Pennsylvania (the "Insurance Department"). The Insurance Department requires insurance companies domiciled in Pennsylvania to prepare their financial statements in accordance with the National Association of Insurance Commissioners' ("NAIC") Annual Statement Instructions and Accounting Practices and Procedures Manual (collectively, "NAIC SAP").

The Pennsylvania Insurance Commissioner has the right to permit accounting practices that deviate from NAIC SAP. The Company did not have any permitted practices in 2024 or 2023.

The term "NONE" or "NOT APPLICABLE" is used in the following notes to indicate that the Company does not have any items requiring disclosure under the respective note.

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of the Company's statutory financial statements in conformity with accounting practices prescribed or permitted by the Insurance Department requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the statutory financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. Accounting Policies

(2) Basis for Bonds and Amortization Method

Bonds not backed by other loans are stated at amortized cost or at the lower of amortized cost or fair value, if rated NAIC 3 or below, in accordance with SSAP No. 26R – Bonds, Excluding Loan-Backed and Structured Securities. Premiums and discounts on bonds are amortized or accreted, respectively, over the life of the related debt security as an adjustment to yield using the scientific method. Interest income is recognized when earned.

(6) Basis for Loan-Backed Securities and Adjustment Methodology

Company reports the securities at the lower of amortized cost or fair value. The Company uses the prospective method to make valuation adjustments when necessary.

D. Going Concern

Management has concluded that there is no doubt regarding the Company's ability to continue as a going concern as of March 31, 2024.

(4) All impaired securities (fair value is less than cost or amortized cost) for which an other-than-temporary impairment has not been recognized in earnings as a realized loss (including securities with a recognized other-than-temporary impairment for non-interest related declines when a non-recognized interest related impairment remains):

a) The aggregate amount of unrealized losses:

1. Less than 12 Months	\$ (24,376)
2. 12 Months or Longer	\$ (2,638,973)

b)The aggregate related fair value of securities with unrealized losses:

1. Less than 12 Months	\$ 2,782,241
2. 12 Months or Longer	\$ 21,010,636

(5) Information Investor Considered in Reaching Conclusion that Impairments are Not Other-Than-Temporary

The Company used pricing services in determining the fair value of its loan-backed securities. In determining that a security is not other-than-temporarily impaired, securities are analyzed for future cash flows by using current and expected losses, historical and expected prepayment speeds (based on Bloomberg and broker dealer survey values), and assumptions about recoveries relative to the seniority or subordination in the capital structure. If the results indicate that we will be able to maintain the current book yield, no other-than-temporary impairment is warranted.

(4) Description of Valuation Techniques and Inputs Used in Fair Value Measurement

Level 1

The Company values securities in the Level 1 category using unadjusted quoted prices for identical assets and liabilities in active markets accessible at the measurement date.

Level 2

The Company values securities in the Level 2 category using market data obtained from sources independent of the reporting entity (observable inputs). Level 2 inputs generally include quoted prices in markets that are not active, quoted prices for similar assets or liabilities, and results from pricing models that use observable inputs such as interest rates and yield curves that are generally available at commonly quoted intervals. The fair values for securities included in the Level 2 category have been developed by third party, nationally recognized pricing services. These services use complex methodologies to determine values for securities and subject the values they develop to quality control reviews. Management reviews service-provided values for reasonableness by comparing data among pricing services and to available market and trade data. Values that appear inconsistent are further reviewed for appropriateness. If a value does not appear reasonable, the valuation is discussed with the service that provided the value and would be adjusted, if necessary. No such adjustments were required in 2024 or 2023.

Level 3

The Company values assets classified as Level 3 in the Fair Value Hierarchy using the Company's own assumptions about market participant assumptions based on the best information available in the circumstances (non-observable inputs). Level 3 inputs are used in situations where little or no Level 1 or 2 inputs are available or are inappropriate given the particular circumstances. Level 3 inputs include results from pricing models for which some or all of the inputs are not observable, discounted cash flow methodologies, single non-binding broker quotes and adjustments to externally quoted prices that are based on management judgment or estimation.

(5) Fair Value Disclosures

NONE

B. Fair Value Reporting under SSAP 100 and Other Accounting Pronouncements

C. Aggregate fair value for all financial instruments and the level within the fair value hierarchy in which the fair value measurements in their entirety fall.

Type of Financial Instrument	Aggregate Fair Value	Admitted Assets	(Level 1)	(Level 2)	(Level 3)	Net Asset Value (NAV)	Not Practicable (Carrying Value)
Cash Equivalents	\$ 263,259	\$ 263,259	\$ 263,259				
Short Term Investments	\$ 898,949	\$ 898,936		\$ 898,949			
Bonds	\$ 30,338,597	\$ 32,966,040		\$ 30,102,050	\$ 236,547		

The following methods are used to estimate fair value for the instruments included in the above table and for fair value measurements in the financial statements in the table A1. Fair Value Measurements at Reporting Date, above.

Cash equivalents in Level 1 are comprised of money market mutual funds that are reported at fair value using net asset value as a practical expedient as prescribed by the NAIC.

Short term investments in Level 1 are valued at cost which approximates fair value.

NOTES TO FINANCIAL STATEMENTS

Level 2 Valuation Methodologies

Below is a summary description of the valuation methodologies primarily used by the pricing services for bonds included in the Level 2 category, by security type:

Short term investments in Level 2 consists of bonds purchased with less than one year remaining until maturity. The methodology used to value Level 2 short term investments is the same as the methodology described for U.S. Government-sponsored enterprise obligations.

U.S. Government obligations, including treasury bills classified as cash equivalents, are valued based on quoted prices for identical assets, or in markets that are not active, quotes for similar assets, taking into consideration adjustments for variations in contractual cash flows and yields to maturity.

U.S. Government-sponsored enterprise obligations are valued using pricing models that consider current and historical market data, normal trading conventions, credit ratings, and the particular structure and characteristics of the security being valued, such as yield to maturity, redemption options, and contractual cash flows. Adjustments to model inputs or model results are included in the valuation process when necessary to reflect recent events, such as regulatory, government or corporate actions or significant economic, industry or geographic events that would affect the security's fair value.

State and municipal bonds are valued using a series of matrices that consider credit ratings, the structure of the security, the sector in which the security falls, yields, and contractual cash flows. Valuations are further adjusted, when necessary, to reflect recent events such as significant economic or geographic events or rating changes that would affect the security's fair value.

Corporate debt consists primarily of corporate bonds, but also includes a small number of bank loans and certificates of deposit with original maturities greater than one year. The methodology used to value Level 2 corporate bonds is the same as the methodology previously described for U.S. Government-sponsored enterprise obligations. Bank loans are valued by an outside vendor based upon a widely distributed, loan-specific listing of average bid and ask prices published daily by an investment industry group. The publisher of the listing derives the averages from data received from multiple market-makers for bank loans.

Residential and commercial mortgage backed securities. Agency pass-through securities are valued using a matrix, considering the issuer type, coupon rate and longest cash flows outstanding. The matrix is developed daily based on available market information. Agency and non-agency collateralized mortgage obligations are both valued using models that consider the structure of the security, current and historical information regarding prepayment speeds, ratings and ratings updates, and current and historical interest rate and interest rate spread data. Evaluations of Alt-A mortgages include a review of collateral performance data, which is generally updated monthly.

Other asset-backed securities are valued using models that consider the structure of the security, monthly payment information, current and historical information regarding prepayment speeds, ratings and ratings updates, and current and historical interest rate and interest rate spread data. Spreads and prepayment speeds consider collateral type.

Evaluations of subprime mortgages are the same as the evaluation methodology previously described for Alt-A mortgages.

Level 3 Valuations

The Company values assets and liabilities classified as Level 3 in the Fair Value Hierarchy using the Company's own assumptions about market participant assumptions based on the best information available in the circumstances (non-observable inputs). Level 3 inputs are used in situations where little or no Level 1 or 2 inputs are available or are inappropriate given the particular circumstances. Level 3 inputs include results from pricing models for which some or all of the inputs are not observable, discounted cash flow methodologies, single non-binding broker quotes and adjustments to externally quoted prices that are based on management judgment or estimation.

Level 3 Valuation Processes

- Level 3 securities are priced by ProAssurance's Chief Investment Officer, who reports to ProAssurance's Chief Financial Officer.
- Level 3 valuations are computed quarterly. Prices are evaluated quarterly against prior period prices and the expected change in price.
- The Company's Level 3 valuations are not overly sensitive to changes in the unobservable inputs used. The securities noted in the disclosure are primarily investment grade debt where comparable market inputs are commonly available for evaluating the securities in question.

Level 3 Valuation Methodologies

Below is a summary description of the valuation methodologies primarily used by the pricing services for bonds included in the Level 3 category, by security type:

State and municipal bonds consist of auction rate municipal bonds valued internally using published quotes for similar securities or by using a model based on discounted cash flows using yields currently available on fixed rate securities with a similar term and collateral, adjusted to consider the effect of a floating rate and a premium for illiquidity.

Corporate debt consists of corporate bonds. Valuations are determined using dealer quotes for similar securities or discounted cash flow models using yields currently available for similar securities. Similar securities are defined as securities having like terms and payment features that are of comparable credit quality. Assessments of credit quality are based on nationally recognized statistical rating organization (NRSRO) ratings, if available, or are subjectively determined by management if not available.
