

JBT Corporation Wins \$26M Gate Equipment Order for Major U.S. Airport

CHICAGO, July 8, 2011 /PRNewswire via COMTEX/ -- **JBT Corporation** (NYSE: JBT) today announced that its JBT AeroTech business has been awarded a \$26 million contract to supply gate equipment for the Tom Bradley International Terminal (TBIT) Expansion Project currently under construction at the Los Angeles International Airport. The contract, placed by Walsh Austin Joint Venture, includes the supply of 37 new Jetway® passenger boarding bridges, JetAire® air handling units, Jetpower® ground power units and other ancillary products.

The TBIT modernization project includes over one million square feet of new building area, including concessions, expanded federal inspection, customs and border protection facilities and enlarged passenger areas sized to accommodate the increased capacity of new-generation aircraft. Eight new passenger gates and ancillary equipment will be integrated during phase I, seven of which will utilize a three boarding bridge configuration to enable servicing of an Airbus A380 aircraft's three decks. Phase II of the project includes work for seven additional gates, one in an A380 three boarding bridge configuration. Both phases include the product integration into the airport equipment monitoring systems.

"Los Angeles International Airport has been an important JBT customer for decades, with currently over 100 Jetway passenger boarding bridges in operation at the airport," said John Lee, Vice President and Division Manager, JBT AeroTech. "So being selected as the supplier for the impressive TBIT modernization project, and one of the world's premier international gateways, is quite an honor."

The order was received in the second quarter of 2011 with the concourse project scheduled to be fully operational in the fourth quarter of 2013.
