PPG Launches Quick-Ship Program for PPG SILVERSAN Powder Coating

05/13/2020

Antibacterial-protected powder coating now available to customers in 48 hours

CHICAGO--(BUSINESS WIRE)-- PPG (NYSE: PPG) today announced the launch of its quick-ship program for PPG SILVERSAN® antibacterial-protected* powder coating that is specially formulated with silver** ionic technology.

PPG *SilverSan* powder technology slowly releases silver ions, which are known to inhibit the growth of bacteria on powder-coated surfaces. Due to current high demand, PPG has committed to two-day shipping on orders of PPG *SilverSan* coating in the top 30 RAL colors that weigh less than 200 pounds (91 kilograms). In addition, PPG has activated five-day shipping on orders for PPG *SilverSan* coating in 170 alternative RAL colors or on shipments that weigh more than 200 pounds. Customers will have the option of shipments to be boxed in 25- or 50- pound (11- or 23-kilogram) packages.

The quick-ship program is possible due to PPG's acquisition of [Alpha Coating Technologies](#) earlier this year. The powder coatings manufacturer is a wholly owned subsidiary of PPG.

"We pride ourselves on listening to our customers and providing creative solutions to meet their demands, especially during these unprecedented times," said Shelley Verdun, PPG powder business manager, Americas. "Our acquisition of Alpha Coating Technologies increases our capabilities in the powder market and allows us to be nimble, strategic and innovative to yield success for our customers."

The special formulation of PPG *SilverSan* allows the inhibition of bacteria growth to remain constant even if the surface has been subjected to wear and exterior exposure. The coating displays exceptional exterior durability and provides resistance to microorganisms on the coated surface. It also offers excellent color retention, formulation of many colors in all PPG resin chemistries and high temperature stability.

Suggested end uses for PPG *SilverSan* coating include fitness equipment, office furniture, hospital furniture, home appliances, lighting, heating and air conditioning, building materials and laboratory equipment. The product should only be applied by professional applicators.

*Antibacterial is limited to the treated surface and does not protect against disease-causing bacteria. The use of these products does not protect users of any such treated article or others against food-borne or disease-causing bacteria, viruses, germs or other disease-causing organisms.

**Silver is a registered pesticide with the U.S. Environmental Protection Agency (EPA), which states that pesticides are used to prevent, destroy, repel or mitigate any pest ranging from insects and animals and weeds to microorganisms such as fungi, bacteria and viruses.

PPG: WE PROTECT AND BEAUTIFY THE WORLD™

At PPG (NYSE:PPG), we work every day to develop and deliver the paints, coatings and specialty materials that our customers have trusted for more than 135 years. Through dedication and creativity, we solve our customers' biggest challenges, collaborating closely to find the right path forward. With headquarters in Pittsburgh, we operate and innovate in more than 70 countries and reported net sales of \$15.1 billion in 2019. We serve customers in construction, consumer products, industrial and transportation markets and aftermarkets. To learn more, visit www.ppg.com.

We protect and beautify the world is a trademark and *SilverSan* and the *PPG Logo* are registered trademarks of PPG Industries Ohio, Inc.
