WEX and Euclid AI Team Up to Bring AI Agents Built for Trucking to OTR Fleets

2026-10-27

Euclid AI's agents enable fleet managers to handle five to 10 times more work while cutting cost per transaction by 80 to 90 percent

PORTLAND, Maine--(BUSINESS WIRE)-- **WEX®** (NYSE: WEX), a global leader in intelligent payment solutions, and **Euclid AI**, the leading provider of agentic AI solutions for asset-based trucking, today announced an agreement to bring AI agents to WEX over-the-road (OTR) customers. Through the agreement, WEX and Euclid AI will work jointly to help WEX customers save time and money by embedding agentic AI at scale across their businesses.

AI has become a business imperative for fleet operators. Carriers operate on thin margins, and allocating expensive resources to processing paperwork, staying compliant, and keeping drivers and customers informed is being streamlined via AI. In production deployments, Euclid's AI agents have enabled each fleet manager to handle five to 10 times more work and have lowered cost per transaction by 80 to 90 percent, allowing carriers to scale without adding costs.

"Our customers are looking for practical ways to take cost and complexity out of running a fleet, and AI agents built specifically for trucking are a significant step forward," said Tim Hampton, senior vice president and general manager for the WEX Over-the-Road business. "Euclid AI builds agents for operations where carriers need it the most. This important collaboration extends how WEX supports carriers beyond our own products."

Euclid AI started where automation can't afford mistakes: asset-based trucking and compliance. The platform's purpose-built Precision Agents automate operations from start to finish.

Some of Euclid AI offerings embed agents into the following workflows:

- Document processing – Read, extract, validate, and file the documents that drive trucking operations, such as bills of lading, proof of delivery, driver qualification, and compliance paperwork
- Communications – Handle the calls, emails, and messages needed to keep loads, drivers, and customers aligned, including status updates, follow-ups, and document requests
- End-to-end workflow – Run multi-step processes from start to finish, such as load documentation through billing or compliance renewals

“WEX is a respected and trusted brand in trucking, and Euclid AI is a leader in AI that fully automates carrier operations,” said Ahmad Kakar, CEO at Euclid AI. “We’ve already delivered major results for the largest carriers in the country. Together, we’re putting that same power in the hands of WEX OTR customers, and we’ll keep building on this collaboration to serve them even better over time.”

WEX OTR customers can learn more about Euclid by contacting their WEX sales representative or by visiting <https://geteuclid.ai/wex>.
